Handbook of Capture-Recapture Analysis Steven C. Amstrup, Trent L. McDonald, Bryan F. J. Manly, 2010-12-16 Every day biologists in parkas raincoats and rubber boots go into the field to capture and mark a variety of animal species Back in the office statisticians create analytical models for the field biologists data But many times representatives of the two professions do not fully understand one another s roles This book bridges this gap by helping biologists understand state of the art statistical methods for analyzing capture recapture data In so doing statisticians will also become more familiar with the design of field studies and with the real life issues facing biologists Reliable outcomes of capture recapture studies are vital to answering key ecological questions Is the population increasing or decreasing Do more or fewer animals have a particular characteristic In answering these questions biologists cannot hope to capture and mark entire populations And frequently the populations change unpredictably during a study Thus increasingly sophisticated models have been employed to convert data into answers to ecological questions This book by experts in capture recapture analysis introduces the most up to date methods for data analysis while explaining the theory behind those methods Thorough concise and portable it will be immensely useful to biologists biometricians and statisticians students in both fields and anyone else engaged in the capture recapture process
