--JULIE LOISELLE

The background of the poster is a dramatic scene. At the top, a helicopter is silhouetted against a dark sky, with a bright light source behind it creating a lens flare. Below the helicopter, the title 'SECURITY' is written in large, bold, yellow, 3D-style letters. Underneath the title, the name 'RANDALL WOOD' is written in smaller, white, sans-serif capital letters. The lower half of the poster shows a city skyline at night or dusk, with buildings silhouetted against a colorful sky. Security Jack Randall 4:

Security Randall Wood, 2014-12-20 Deep under the city of Niagara Falls lies the largest tunnel ever constructed. It's already a target for terrorists. Soon to be completed, it will supply a steady supply of water to the Robert Moses Power Plant, a facility that supplies most of the energy for the upper east coast of the United States. Jack and his team arrive to inspect the security of the project before it goes into operation, but Al Qaeda has other plans. Taking over the facility, the terrorists now hold the staff and the entire eastern seaboard hostage. Jack finds himself cut off and trapped. He has two problems: One, he's 400 feet underground, and two, one of the hostages is his wife. The terrorists think they have the upper hand, but they don't know Jack.

Security Randall Wood, 2025-02-15 An FBI agent and a reluctant engineer are the only thing standing between a terrorist group and the blackout of the entire eastern seaboard.

Regional Powers and Security Orders

Robert Stewart-Ingersoll, Derrick Frazier, 2012 This book presents a new theoretical framework through which to understand the role of regional powers in creating and maintaining regional security orders As a result of the retreat of the global powers since the end of the Cold War it has become clear that international security dynamics are less explicable without considering the regional level as a primary focus for most states The authors contend that these dynamics which include the identification management and prevention of security threats are heavily influenced by regional powers The regional level in this text is defined on the basis of regional sub systems more specifically Regional Security Complexes Within this context the authors utilize their framework to address how security orders are defined and how regional powers are identified The focus then turns to an analysis of how the roles and foreign policy orientations of regional powers conditioned by the presence of material capabilities affect the development of regional security orders The authors then present a comparative analysis of Russia Brazil and India within their own security complexes to demonstrate an application of the framework This book will be of interest to students of regional security international security foreign policy and International Relations in general

Drones and Global Order Paul Lushenko, Srinjoy Bose, William Maley, 2021-12-28

This book explores the implications of drone warfare for the legitimacy of global order The literature on

drone warfare has evolved from studying the proliferation of drones to measuring their effectiveness to exploring their legal moral and ethical impacts These three waves of scholarship do not however address the implications of drone warfare for global order This book fills the gap by contributing to a fourth wave of literature concerned with the trade offs imposed by drone warfare for global order The book draws on the English School of International Relations Theory which is premised on the existence of a society of states bounded by common norms values and institutions to argue that drone warfare imposes contradictions on the structural and normative pillars of global order These consist of the structure of international society and diffusion of military capabilities as well as the sovereign equality of states and laws of armed conflict The book presents a typology of contradictions imposed by drone warfare within and across these axes that threaten the legitimacy of global order This framework also suggests a confounding consequence of drone warfare that scholars have not hitherto explored rigorously drone warfare can sometimes strengthen global order The volume concludes by proposing a research agenda to reconcile the complex and often counter intuitive impacts of drone warfare for global order This book will be of considerable interest to students of security studies global governance and International Relations

The Supply Side of Security Tongfi Kim, 2016-04-13 *The Supply Side of Security* conceptualizes military alliances as contracts for exchanging goods and services At the international level the market for these contracts is shaped by how many countries can supply security Tongfi Kim identifies the supply of policy concessions and military commitments as the main factors that explain the bargaining power of a state in a potential or existing alliance Additionally three variables of a state's domestic politics significantly affect its negotiating power whether there is strong domestic opposition to the alliance whether the

state's leader is pro alliance and whether that leader is vulnerable Kim then looks beyond existing alliance literature which focuses on threats to produce a deductive theory based on analysis of how the global power structure and domestic politics affect alliances As China becomes stronger and the U S military budget shrinks *The Supply Side of Security* shows that these countries should be understood not just as competing threats but as competing security suppliers **Mutual Security**
