Sedona Manual 2015:

Bankruptcy Litigation Manual, 2015-2016 Edition By Michael L. Cook, 2015-11-11 Every step in the business bankruptcy litigation process is covered in Aspen Publishers and Bankruptcy Litigation Manual from the drafting of the first pleadings through the appellate process. In fact, by making the Bankruptcy Litigation Manual a part of your working library, you not only get detailed coverage of virtually all the topics and issues you must consider in any bankruptcy case, you also get field-tested answers to questions you confront every day such as: How to stay continuing litigation against a corporate debtor and its non-debtor officers? What are the limits on suing a bankruptcy trustee? Is the Deprizio Doctrine still alive? Does an individual debtor have an absolute right to convert a case from Chapter 7 to Chapter 13? What prohibitions exist on cross-collateralization in financing disputes? Are option contracts and executory contracts enforceable for bankruptcy purposes? When and under what circumstances may a bankruptcy court enjoin an administrative proceeding against a Chapter 11 debtor? What are the current standards for administrative priority claims? When must a creditor assert its setoff rights? When can a remand order issued by a district court be reviewed by a court of appeals? What are the limits on challenging pre-bankruptcy real property mortgage foreclosures as fraudulent transfers? Can an unsecured lender recover contract-based legal fees incurred in post-bankruptcy litigation on issues of bankruptcy law? Is there a uniform federal limitation on perfecting security interests that primes a longer applicable state law period, thus subjecting lenders to a preference attack? Do prior bankruptcy court orders bar a plaintiff's later state court suit and warrant removal of the action in federal court? Michael L. Cook, a partner at Schulte Roth and Zabel LLP in New York and former long-time Adjunct Professor at New York University School of Law, has gathered together some of the country's top bankruptcy litigators to contribute to Bankruptcy Litigation Manual. Managing Discovery of Electronic Information Federal Judicial Center (U S), 2017-08-18 This third edition reflects the December 1 2015 amendments to the Federal Rules of Civil Procedure and the reasons for the amendments This third edition also reflects the rise of new devices on which electronically stored information ESI is created and stored such as smartphones and new sources of ESI such as social media This guide updates judges on how ESI may be searched and also suggests case management techniques that judges might use in smaller civil actions in which the costs of ESI discovery could hamper resolution on the merits Examples of Electronically stored information ESI include email messages word processing files webpages and databases that are created and stored on computers magnetic disks i e computer hard drives optical disks

i.e. DVDs and CDs and flash memory i.e. thumb or flash drives. Additionally, ESI is stored on cloud-based servers often hosted by third parties that can be accessed through internet connections. Unlike paper documents, ESI can be produced formatted in different forms and stored in numerous places plus metadata is often stored within the electronic document that is not available in printed format such as dates of file creation, file revisions, etc. The choice and form of production was not an issue with paper discovery but it can lead to disputes in ESI discovery. Geomatics Applied to Civil Engineering

Irineu da Silva, Paulo C. L. Segantine, 2025-05-13. This textbook deals jointly with theoretical and practical concepts within geomatics in civil engineering based on the global understanding of its use. Written by civil engineers with professional backgrounds in geomatics, the book has a number of unique characteristics including analysis of geodetic references and their coordinate systems to allow their conversions and applications taking into account the local topographic plan analysis of the measurements of directions, angles, and distances; inserting them into the concepts of practical use of modern measuring instruments; detailed description of the main components of measurement instruments used in geomatics; discussion of instrumentation errors and their implications; and a complete study of UTM Projection System and its variants, equations, and practical application in civil engineering projects. For students and instructors and practitioners, the subjects covered in the book are organized to cover most topics related to the disciplines of surveying or geomatics studied in civil engineering courses. It is entirely based on adjustment computation for spatial data analysis including coordinate geometry and traverse computation. To this end, an entire chapter is devoted to adjustment computation based on matrix theory to help readers understand its applications in spatial data analysis throughout the book's chapters, including chapters on modern technologies such as conventional and UAV-based digital photogrammetry, digital terrain modelling, terrestrial laser scanning, and BIM.
