Coverage of single and multi-family dwellings: complete coverage of houses, row homes and quadruplexes as dictated by the International Residential Building Codes.

Architectural Graphic Standards for Residential Construction Janet Rumbarger, Richard Vitullo, 2003 Publisher description *Architectural Graphic Standards* The American Institute of Architects, 2007-03-30 Since 1932 the ten editions of *Architectural Graphic Standards* have been referred to as the architect's bible. From site excavation to structures to roofs, this book is the first place to look when an architect is confronted with a question about building design. With more than 8,000 architectural illustrations including both reference drawings and constructible architectural details, this book provides an easily accessible graphic reference for highly visual professionals. To celebrate seventy-five years as the cornerstone of an industry, this commemorative Eleventh Edition is the most thorough and significant revision of *Architectural Graphic Standards* in a generation. Substantially revised to be even more relevant to today's design professionals, it features: An entirely new innovative look and design created by Bruce Mau Design that includes a modern page layout, bold second color and new typeface. Better organized: a completely new organization structure applies the UniFormat classification system which organizes content by function rather than product or material. Expanded and updated coverage of inclusive, universal and accessible design strategies. Environmentally sensitive and sustainable design is presented and woven throughout, including green materials, LEEDS standards and recyclability. A bold contemporary new package as impressive closed as it is open. The Eleventh Edition features a beveled metal plate set in a sleek black cloth cover. Ribbon Markers included as a convenient and helpful way to mark favorite and well-used spots in the book. All New material Thoroughly reviewed and edited by hundreds of building science experts and experienced

architects all new details and content including new structural technologies building systems and materials emphasis on sustainable construction green materials LEED standards and recyclability expanded and updated coverage on inclusive universal and accessible design strategies computing technologies including Building Information Modeling BIM and CAD CAM new information on regional and international variations accessibility requirements keyed throughout the text new standards for conducting disseminating and applying architectural research New and improved details With some 8 500 architectural illustrations including both reference drawings and constructible architectural details Architectural Graphic Standards continues to be the industry s leading easily accessible graphic reference for highly visual professionals
