

	<p>always added by default.</p> <p>You can add, select and/or delete single key frames with help of the controls. (Only available when the Use key frames check box is selected.)</p> <p>Click the Create key frame button to add a key frame to the chosen timeline slider position. Click the Go to the next key frame/Go to the previous key frame buttons to select the key frames on the timeline. If you click the main button again, a highlighted key frame is deleted (Delete key frame).</p> <p>Additionally, you can choose from three interpolation methods. The Linear interpolation method sets a constant alteration rate from single key frame to key frame; this method is set by default. The Bezier interpolation method sets a smooth step-up from key frame to key frame that softly fades away. The Hold interpolation method abruptly changes to a chosen value without gradual transition.</p>
Button Delete	Removes the effect from the item in your compilation. Not available for basic effects.

Only one transition can be applied to a video clip or picture at once. If you drop a second transition, the first transition is replaced. Clicking the  button at the left side of any transition's headline expands an extended area which shows the respective transition's setting options. You can adjust these individual properties. The following setting options are always available:

Button 	Enables / disables a transition temporarily.
Input field Duration	Displays and defines the duration of the transition. The duration is set to one second by default.
Buttons Alignment	Defines if a transition is aligned more to the left (end at cut), more to the right (start at cut), or if it stays centered between two clips. A transition is centered between two clips by default.
Button Delete	Removes the transition. You can also press the Del key on your keyboard to delete a selected transition from your compilation.
