Assessment and Teaching of 21st Century Skills Esther Care,Patrick Griffin,Mark Wilson,2017-11-07 This book provides a detailed description of research and application outcomes from the Assessment and Teaching of 21st Century Skills project which explored a framework for understanding the nature of these skills The major element of this new volume is the presentation of research information from the global assessment of two 21st century skills that are amenable to teaching and learning collaborative problem solving and learning in digital networks The outcomes presented include evidence to support the validity of assessment of 21st century skills and descriptions of consequent pedagogical approaches which can be used both to teach the skills and to use them to enhance key learning goals in secondary education systems The sections of the volume are connected through a focus on the degree to which innovative assessment tasks measure the constructs of interest This focus is informed by conceptual and methodological issues associated with affordances of 21st century computer based assessment How understanding of the nature of the skills as derived from these assessments can guide approaches to the integration of 21st century skills in the classroom is informed by initiatives adopted by participating countries The guiding questions in this volume are Do the assessment tasks measure the constructs and What are the implications for assessment and teaching in the classroom It is the third volume of papers from this project published by Springer

Cleaner Coal in China International Energy Agency,Organisation for Economic Co-operation and Development,2009 China s coal mined locally and available at a relatively low cost has brought enormous benefits to energy consumers in China and to those outside the country who enjoy the products of its coal based economy Yet from another perspective China s coal use has a high cost Despite progress health and safety in the thousands of small coal mines lag far behind the standards achieved in China s modern large mines Environmental degradation is a real and pressing problem at all stages of coal production supply and use Adding to these burdens emissions of carbon dioxide are of concern to the Chinese government as it embarks on its own climate protection strategy Technology solutions are already transforming the way coal is used in China and elsewhere This study explores the context in which the development and deployment of these technologies can be accelerated Providing a large amount of new data it describes in detail the situation in China as well as the experiences of other countries in making coal cleaner Above all the report calls for much greater levels of collaboration existing bi lateral and multi lateral co operation with China on coal is found lacking China s growing openness presents many commercial opportunities Establishing a global market for cleaner coal technologies is key to unlocking the potential of technology one of ten major recommendations made in this study

Development Pang, Chung-Yeung, 2020-02-14 As the software industry continues to evolve professionals are continually searching for practices that can assist with the various problems and challenges in information technology IT Agile development has become a popular method of research in recent years due to its focus on adapting to change There are many factors that play into this process so success is no guarantee However combining agile development with other software engineering practices could lead to a high rate of success in problems that arise during the maintenance and development of computing technologies Software Engineering for Agile Application Development is a collection of innovative research on the methods and implementation of adaptation practices in software development that improve the quality and performance of IT products The presented materials combine theories from current empirical research results as well as practical experiences from real projects that provide insights into incorporating agile qualities into the architecture of the software so that the product adapts to changes and is easy to maintain While highlighting topics including continuous integration configuration management and business modeling this book is ideally designed for software engineers software developers engineers project managers IT specialists data scientists computer science professionals researchers students and academics

Discrimination based on Colour, Ethnic Origin, Language, Religion and Belief in Turkey's Education System Nurcan Kaya, 2015-10-27 The Turkish government is urged to make a fundamental shift in its approach to education by Minority Rights Group International MRG in a new report A long standing focus on state building has been supplemented by increasing emphasis on religious teaching Both feature strongly in the education system in Turkey making schools a focus of discrimination The report *Discrimination based on Colour Ethnic Origin Language Religion and Belief in Turkey's Education System* reveals evidence of discrimination of minority groups and suggests comprehensive reforms to effectively ensure equality The national education system which for decades aimed to create young Turkish nationalists has in recent years become a vehicle for raising young religious Turkish nationalists says Nurcan Kaya Turkey Coordinator of Minority Rights Group International Religious education is compulsory from grade four in primary schools While some information on world religions has been introduced the emphasis remains on teaching Sunni Muslim religious practices Children of Jewish and Christian families may apply to opt out but the process can be cumbersome and in many schools alternatives are not provided for them Non Muslim students who have opted out can still find themselves having to remain in the religious instruction class or alternatively having to wander in the school corridor making them vulnerable to taunts from pupils and even teachers The opt out possibility is still not available to children of other minorities Another issue is mother tongue education In 2012 a new elective on the living languages and dialects in Turkey was introduced but due to various limitations minorities remain marginalised others in the education system Subsequent to the 2012 reform the report monitors discrimination in the formal education system in the period of the academic year of 2014 2015 The findings are based on the field work of the Monitoring Discrimination in Education Network an alliance of 16 organizations working in Turkey The

report compiles numerous cases of discrimination based on language religion ethnicity skin colour and the level of income In order to bring about a fundamental solution to these problems in the education system the government must prioritise developing an approach that sees all groups as equal and that responds to demands for rights based on such an understanding of equality says Kaya The report highlights that Turkey has no anti discrimination law or an equality commission to which victims of discrimination can apply The existing legislation contains no effective and accessible means of judicial remedies or compensation Therefore many discriminatory practices are not reported to school administrations The entire education system is based on Turkishness Non Turkish groups are either not referred to or referred in a negative way says Kaya Education system has played a significant role in deepening conflict in society The positive representation of other groups in the education system would contribute to social peace and harmony In order to resolve the many problems in the education system that the current approach causes the overall aim of government education policy should be cleared of ideological references and the protection of children s best interests and the right to education in line with international standards should be considered its fundamental goal says the report
