Crisis and Critique Rodrigo Cordero, 2016-07-15 Fragility is a condition that inhabits the foundations of social life. It remains mostly unnoticed until something breaks and dislocates the sense of completion. In such moments of rupture, the social world reveals the stuff of which it is made and how it actually works; it opens itself to question. Based on this claim, this book reconsiders the place of the notions of crisis and critique as fundamental means to grasp the fragile condition of the social and challenges the normalization and dissolution of these concepts in contemporary social theory. It draws on fundamental insights from Hegel, Marx, and Adorno as to recover the importance of the critique of concepts for the critique of society and engages in a series of studies on the work of Habermas, Koselleck, Arendt, and Foucault as to consider anew the relationship of crisis and critique as immanent to the political and economic forms of modernity. Moving from crisis to critique and from critique to crisis, the book shows that fragility is a price to be paid for accepting the relational constitution of the social world as a human domain without secure foundations but also for wishing to break free from all attempts at giving closure to social life as an identity without question. This book will engage students of sociology, political theory, and social philosophy alike.

sexism imperialism climate change etc But if the people have the power to resist these structures of domination and inequality they also have the power to reinforce them By treating democracy as an end in itself political theorists of a critical bent overwhelmingly assume that the demos if given the opportunity will advance progressive or even radical politics But given the recent successes of right wing populism and the persistence of pathological views such as climate skepticism is this assumption still warranted If not then can democracy really save us The Making of Totalitarian Thought Josep R. Llobera,2003-06-01 The totalitarian regimes of the twentieth century reveal disturbing and uncomfortable facts about human nature social life and moral progress Totalitarianism ironically came at a time when the spirit of modernity was in full swing and human potential was supposedly at its peak Distracted by the wonders of the industrial revolution few would have guessed the horrors that were just around the corner Focusing on the historical background to twentieth century totalitarianism this book unravels the complexity and mystery behind ideas of domination leadership and human development In doing so it not only sheds light on the dark side of modern thought but also shows that the foundations of totalitarian ideology existed long before the modern age Totalitarian thought is best understood by looking at four fundamental myths about race the crowd revolutionary violence and eugenics This book analyzes each myth in depth by tracing its beginnings and development It shows how key socio political thinkers wrote about and interpreted these myths and how they became the basis of many important racial and social theories Specific attention is given to six controversial nineteenth century thinkers Maistre Gobineau Galton Le Bon Vacher and Sorel Llobera through detailed analysis of their work suggests that these so called prophets of doom with their anti bourgeois elitist and anti progressive leanings understood the socio political reality of modern society far more accurately than other highly praised social thinkers of the same period These key figures provide a crucial insight into totalitarianism by overturning nineteenth century illusions of progress and laying bare the darker aspects of human nature The Making of Totalitarian Thought is an accessible and penetrating overview of a compelling phenomenon It emphasizes the importance of previously neglected socio political writing and neatly unpacks sophisticated intellectual ideas This *Resources in Education* ,1977-05 Church Growth and the Whole Gospel C. Peter Wagner,1998-12-15 Has the church growth movement failed to stress the social dimensions of the Christian faith Dr Peter Wagner a leading exponent of church growth argues that Christians can evangelize and churches can grow strongly while at the same time participating in the global struggle on behalf of the poor and oppressed for justice and peace for brotherhood and liberation and for the alleviation of human suffering **The Devil in History** Vladimir Tismaneanu,2012-09-28 The Devil in History is a provocative analysis of the relationship between communism and fascism Reflecting the author s personal experiences within communist totalitarianism this is a book about political passions radicalism utopian ideals and their catastrophic consequences in the twentieth century s experiments in social engineering Vladimir Tismaneanu brilliantly compares communism and fascism as competing sometimes overlapping and occasionally strikingly similar systems of political

totalitarianism He examines the inherent ideological appeal of these radical revolutionary political movements the visions of salvation and revolution they pursued the value and types of charisma of leaders within these political movements the place of violence within these systems and their legacies in contemporary politics The author discusses thinkers who have shaped contemporary understanding of totalitarian movements people such as Hannah Arendt Raymond Aron Isaiah Berlin Albert Camus Francois Furet Tony Judt Ian Kershaw Leszek Kolakowski Richard Pipes and Robert C Tucker As much a theoretical analysis of the practical philosophies of Marxism Leninism and Fascism as it is a political biography of particular figures this book deals with the incarnation of diabolically nihilistic principles of human subjugation and conditioning in the name of presumably pure and purifying goals Ultimately the author claims that no ideological commitment no matter how absorbing should ever prevail over the sanctity of human life He comes to the conclusion that no party movement or leader holds the right to dictate to the followers to renounce their critical faculties and to embrace a pseudo miraculous a mystically self centered delusional vision of mandatory happiness
