What I am going to talk to you about through this essay is Self-concept and how it is developed and how many kinds and types of self-concepts there are. Persons with negative self concept are people that think little of themselves and think that they are not important. Self-concept is developed primarily through our communication with others, we are social and there for we develop an understanding of ourselves as a result of our relationships with others. We make a image of ourselves by the way that a friend or another person talks to us and communicates with us, that is called a feedback meaning that you will see yourself as other people treat you, for example a parents feedback will help their child understand who they are. As a child gets older he starts getting more feedback from different people even maybe feedbacks from his/her older brother or sister. As we get older our self-concept matures, and the influence of the feedback from others is not as strong as when we were kids. As we become surer of
