The Assessment Bridge Pearl G. Solomon, 2002-06-14 Just the kind of bridge we need to span the ideological wars and make schools work for teachers and their students Ann Lieberman Senior Scholar Carnegie Foundation for the Advancement of Teaching Visiting Professor Stanford University In her supremely well written and useful book Dr Solomon has woven together historical perspective research and her own considerable experience to address reforming schools in the 21st Century After defining the problem productive change Dr Solomon has examined old solutions and conceptualized new ones to create better schools for students Nancy Goldman Director of Curriculum Pearl River School District Pearl River NY Standards and implementation of the learning process go hand in hand The Assessment Bridge makes us clearly aware of the present need for a bridge between the two so that standards may not create greater failure and the rejection of formal education by many children Matthew Foley Pastor Epiphany Roman Catholic Church We must ensure that tests serve the needs of education not force education to fulfill needs of test creators The Assessment Bridge is award winning educator Pearl Solomon's penetrating and cogent examination of today's high stakes standards based testing

movement which seems to compromise effective teaching and learning rather than improve it. Committed teachers know the importance of student assessment as a guide to classroom instruction. Restoring assessment to its proper place in the curriculum is the goal of this clear-headed analysis. Chapters cover:

- The origins and history of the current testing movement
- How good tests guide teaching and learning
- How to balance standardized tests, curriculum standards, and critical local variables such as class size, socioeconomics, and teacher attitudes
- How to build bridges from test anxiety to improved student learning
- Teacher training
- Curriculum and instruction
- School administration and leadership
- How to recruit, train, and nurture a new generation of talented, committed, and effective teachers
- Emphasizing the positive at all times

Solomon guides us toward creation of better schools where the best teachers and school leaders link tests to standards, curriculum, and improved student learning.

*NAEP 1992 Mathematics State Report for New York* National Assessment of Educational Progress, Princeton, NJ., 1993. In 1990, the National Assessment of Educational Progress (NAEP) included a Trial State Assessment, which for the first time in the NAEP's history, made voluntary state-by-state assessments. This 1992 mathematics report marks the first attempt of the National Center for Education Statistics (NCES) to shift to standards-based reporting of National Assessment statistics. NAEP results are reported by achievement levels, which are descriptions of how students should perform relative to a body of content reflected in the NAEP frameworks. In other words, how much students should know.

The 1992 assessment covered six mathematics content areas:

1. numbers and operations
2. measurement
3. geometry
4. data analysis, statistics, and probability
5. algebra and functions
6. estimation

This report describes the mathematics performance of District of Columbia fourth- and eighth-grade students in public schools and compares their overall performance to students in the Northeast region of the United States and the nation. The distribution of the results are provided for subpopulations of students including race, ethnicity, type of community, advantaged/disadvantaged, urban, extreme rural, and other parents' education level, gender, and content area performance.
