Math Mammoth Add & Subtract 2-A Maria Miller,2024-04-07 Math Mammoth Add such as adding just one more a trick with nine and eight and subtracting using addition memorizing the basic addition and subtraction facts of single digit numbers with an answer between 10 and 18 While focusing on addition and subtraction techniques the lessons also include many word problems The goal is to memorize the facts or at least become so fluent with them that an outsider cannot tell if the child remembers the answer or uses some mental math strategy to get the answer Some children will accomplish this quicker and need less practice whereas others will take longer Thus don t assign all the exercises in the book by default Use your judgment and try to match the amount of exercises to your child s need The ones that don t get assigned can be used later for review You can also use games to reinforce the facts and in place of some of the exercises in the book a list of games is provided in the book Learning addition and subtraction facts is quite important for later study For example regrouping in addition and subtraction carrying borrowing requires the ability to recall the basic facts efficiently and fluently We will start the book with a few mental math strategies Add Using Just One More and A Trick with Nine and Eight The lesson Adding within 20 reviews those strategies and gives more practice These initial lessons don t yet involve actual memorization techniques The lesson Subtract to Ten explains another basic strategy and has to do with subtracting in parts For example to do 13 5 one can subtract 5 in two parts first do 13 3 which equals 10 and then subtract the rest or 2 more Memorizing the subtraction facts will be more efficient but I want children to understand this strategy because it is useful in many other situations also Then we review how to complete the next whole ten which is an important concept An example of this concept

is the question What number do you add to 23 to get 30 As an equation we write $23 + \underline{\quad} = 30$ In the next lesson we study sums that go over ten doing these sums in two parts For example in the sum $9 + 7$ the child first completes 10 by adding 9 + 1 Then the child adds the rest or 6 to 10 Learning this prepares the child for addition facts where the sum is more than 10 The next lessons Adding with 9 Adding with 8 Adding with 7 and Adding with 6 provide lots of practice for learning and memorizing the basic addition facts There are 20 such facts $9 + 2$ till $9 + 9$ 8 facts $8 + 3$ till $8 + 8$ 6 facts $7 + 4$ till $7 + 7$ 4 facts $6 + 5$ till $6 + 6$ 2 facts The last part of the book includes various lessons titled Number Rainbows and Fact Families with These give lots of practice and reinforcement for the basic addition and subtraction facts emphasizing the connection between addition and subtraction as a strategy for subtraction facts The follow up to this book Add Subtract 2 B practices adding and subtracting two digit numbers mentally and in columns regrouping
