## Rubber Band Gun Plans:

Experience Building the RotaryMek-10x Rubber Band Machine Gun Julian Lyndon Marsh,2012-08-31 This is the definitive guide book for building the RotaryMek 10X rubber band machine gun one of the world s most advanced rubber band gun designs To see a video demonstration of the gun and a preview of the book look on the web for a video of the same title Building the RotaryMek 10X is a complex time consuming woodworking project Although successful completion of this project does not require particularly sophisticated woodworking techniques the builder will need to have access to and be able to skillfully use a number of different tools including a drill press band saw and computer based scanner and printer The end result of this project is a rubber band gun unlike any other a truly fully automatic rapid firing rubber band machine gun In a manner analogous to a real machine gun the mechanism of the RotaryMek 10X is driven by energy derived from the same source as that which propels the projectiles the elastic potential energy of the stretched rubber band ammunition loaded onto the gun There s no crank no motor just a trigger and a can of whoop ass If properly constructed from high quality materials the RotaryMek 10X can be loaded with as many as seventy size 33 rubber bands at one time The gun develops an extremely high rate of fire think of a Minigun but it also has a responsive trigger system allowing an operator to choose between firing many short bursts or just letting rip fire hose style Please note that this project calls for the use of US standard dimensional lumber as well as two different sizes of US standard PVC plumbing pipe Prospective builders outside the United States might first want to check the availability of the needed materials before committing to the project

Island Japan paints a colorful and entertaining picture of a particular place and time in Japan Japan is made up of thousands of sacred islands artificial islands industrial islands resort islands wild islands and exploding islands but artist Florent Chavouet had only ever visited two of them This graphic novel is the story of one summer when he decides to get to know one more the tiny island of Manabeshima This speck of dirt in the Inland Sea off the coast of Osaka has a total population of 300 and he sets himself the task of recording everything and everyone he meets there in quirky detail on the pages of his sketchbook Whereas Chavouet s other best selling book Tokyo on Foot focuses on the physical city it is the local island inhabitants who form the heart of this new book Chavouet s sensitive drawings and insightful captions create instant portraits of incredible literary depth The cast of characters who are lovingly depicted includes Ikkyu san owner of the island s only bar and the bar s three regulars skinny guy Day Glo cap guy and greasy haired guy the young Nakamura family and their five kids the layabout Shimura san a living relic from the hippie 1970s Kurata san the policeman Reizo san the island intellectual in his elegant Meiji era home Rock the Neanderthal fisherman and a chorus of assorted grandmothers and cats all of whom welcome Chavouet into their community as a kindred soul Against a backdrop of fireworks summer festivals fishing expeditions and the constant hum of the cicadas Chavouet depicts these characters so vividly and sympathetically and describes their rustic way of life in such simple and appealing terms that we find it as hard to finish the book as Chavouet found it to leave the island at the end of his enchanted summer holiday
