The cover art features two characters in a field of tall yellow grass. On the left, a woman with dark skin, short dark hair, and small white horns stands in a dynamic pose, holding a long red staff. She wears a white blazer over a white crop top and white shorts. To her right, a younger person with light skin and dark hair, wearing a red t-shirt, stands with their hands on their head, looking upwards. In the background, a large, pale, crescent-shaped moon hangs in a light blue sky. The overall style is a blend of comic book illustration and painterly textures.

textual contexts and on their background in the literary and Christian intellectual milieu of the time. Contrary to existing studies, this method is non-reductive in that it does not aim at providing a synthesis about Odin's original nature on the basis of the differing textual uses of Odin in the Middle Ages. The book argues that the perceived complexity of Odin often highlighted in research is first and foremost a function of the complex textual material spanning a wide variety of genres, each with its particular literary conventions and of the reception of Odin in early modern and modern mythological studies.

Iron Age Myth and Materiality Lotte Hedeager, 2011-04-29. *Iron Age Myth and Materiality: an Archaeology of Scandinavia AD 400-1000* considers the relationship between myth and materiality in Scandinavia from the beginning of the post-Roman era and the European Migrations up until the coming of Christianity. It pursues an interdisciplinary interpretation of text and material culture and examines how the documentation of an oral past relates to its material embodiment. While the material evidence is from the Iron Age, most Old Norse texts were written down in the thirteenth century or even later. With a time lag of 300 to 900 years from the archaeological evidence, the textual material has until recently been ruled out as a usable source for any study of the pagan past. However, Hedeager argues that this is true regarding any study of a society's short-term history, but it should not be the crucial requirement for defining the sources relevant for studying long-term structures of the *longue durée* or their potential contributions to a theoretical understanding of cultural changes and transformation. In Iron Age Scandinavia, we are dealing with persistent and slowly changing structures of worldviews and ideologies over a wavelength of

nearly a millennium Furthermore iconography can often date the arrival of new mythical themes anchoring written narratives in a much older archaeological context Old Norse myths are explored with particular attention to one of the central mythical narratives of the Old Norse canon the mythic cycle of Odin king of the Norse pantheon In addition contemporaneous historical sources from late Antiquity and the early European Middle Age the narratives of Jordanes Gregory of Tours and Paul the Deacon in particular will be explored No other study provides such a broad ranging and authoritative study of the relationship of myth to the archaeology of Scandinavia Catalogue of Works (other Than Parliamentary Papers and Acts of Parliament) Published by His Majesty's Stationery Office Great Britain.
