Dimension Groups and Dynamical Systems Fabien Durand, Dominique Perrin, 2022-02-03 This book is the first self contained exposition of the fascinating link between dynamical systems and dimension groups The authors explore the rich interplay between topological properties of dynamical systems and the algebraic structures associated with them with an emphasis on symbolic systems particularly substitution systems It is recommended for anybody with an interest in topological and symbolic dynamics automata theory or combinatorics on words Intended to serve as an introduction for graduate students and other newcomers to the field as well as a reference for established researchers the book includes a thorough account of the background notions as well as

detailed exposition with full proofs of the major results of the subject A wealth of examples and exercises with solutions serve to build intuition while the many open problems collected at the end provide jumping off points for future research [A Catalogue of Works in All Departments of English Literature, Classified](#) Longman (Firm), Longman, Brown, Green, and Longmans, 1843 **Galois Theories of Linear Difference Equations: An Introduction** Charlotte Hardouin, Jacques
