Crickmore,2023-11-23 The SR 71 Blackbird is an iconic aircraft that has come to symbolize America's technological superiority during the Cold War Using recently declassified information globally renowned expert Paul Crickmore updates his definitive account of the aircraft The Lockheed SR 71 Blackbird ranks as one of the most elegant sleek and powerful aeroplanes ever designed But it was not built to be admired it was built not to be seen at all The high altitude aerial reconnaissance sorties it was to perform were top secret and carefully concealed from public knowledge However as the aircraft have become museum pieces and details of their work declassified the whole story of their design and operation can finally be told This updated edition of Paul

Crickmore's classic Lockheed Blackbird Beyond the Secret Missions is based on 850 pages of documentation and images declassified by the CIA covering the A-12 Oxcart programme. These highly significant documents range from discussions at the highest levels of the US government concerning the rationale for Oxcart's development and eventual deployment to extremely detailed intelligence data gleaned from each of the 29 operational missions flown by Oxcart during Operation Black Shield. The Blackbird family of aircraft continue to fascinate a wide age group and since the aircraft will never fly again its history has become timeless. This new edition will provide the last word on the SR-71 Blackbird and its operational history.

MEMOIR: DYNAMITE, CHECK SIX Ray Jones, 2013. This book isn't primarily about relationships. There's no romance involved, not even any close friendships. It's mostly about flying machines and their missions. But people are important. After all, pilots fly the machines. There are a lot of characters here that aviation buffs will immediately recognize. Lots of record-setting test pilots and even some astronauts. Older non-buffs will also see familiar names: an aviation legend, first ever moon walkers, a couple of popular entertainers, a famous TV news anchor, and even two former presidential candidates. Watch closely; some of them just flash past. Airplanes star in this tale. None of them were perfect, but many of them excelled performing their assigned tasks. North American Aircraft's F-86F was a beautiful machine. But it was also a breathtakingly good MiG killer. Because of its fine flying qualities, it was fun to fly, a sports car among sedans. Fairchild Chase Aircraft's C-123B was an outstanding assault transport. It was almost perfect for its mission in Vietnam, but it could be a real handful for any pilot to fly. I have lots of favorite airplanes, but Douglas A-1H Skyraider stands out. There has never been a better attack fighter in terms of accuracy in iron bomb delivery, weapons load-carrying ability, or endurance. Lockheed's F-104A or C models were many pilots' dream machines. Their luster dimmed somewhat for me after I flew them. But they were certainly suitable for training Test Pilot School students to perform zooms and shuttle aircraft-type approaches and landings. I'll stop with these four. There's much more on airplanes inside, about 192,000 words worth. That's a lot to slog through, and you may find some parts too technical or too detailed. Ignore them. There are also many numbers, but most aren't important. Browse for good stuff. If you want more info on some airplane, Google her up. **Aero Digest**, 1956. **NASA Scientific and Technical Reports**.
