

SSA-424A Dual Digital Hybrid

The SSA-424A Dual Digital Hybrid interfaces two 2-wire intercom lines to two 4-wire lines. Unlike earlier analog hybrids, the SSA-424A features advanced digital signal processing to achieve automatic nulling of the 2-wire lines. Plus, each hybrid features convenient peak-reading level meters to quickly match the levels between the lines that are being interfaced. The result is easy and accurate setup. With the SSA-424A, all need for test tones, nulling adjustments and ducking adjustments have been eliminated. Compatible 2-wire intercom systems include RTS™ TW, Audiocom®, and Clear-Com™. Compatible with 4-wire intercom systems. An internal call signal option board is also available for the SSA-424A. This option board provides call signal compatibility with any of the 2-wire systems listed above. The output can also be directly connected to an ADAM or Zeus GPI port. No external circuitry is required. With features like digital signal processing, peak-reading level meters and optional call signal interfacing, the SSA-424A Dual Digital Hybrid assures ease of setup and maximum transparency between intercom systems.
