Conversion After Socialism Mathijs Pelkmans, 2009-11-01 The large and sudden influx of missionaries into the former Soviet Union after seventy years of militant secularism has been controversial and the widespread occurrence of conversion has led to anxiety about social and national disintegration Although these concerns have been vigorously discussed in national arenas social scientists have remained remarkably silent about the subject This volume s focus on conversion offers a novel approach to the dislocations of the postsocialist experience In eight well researched ethnographic accounts the authors analyze a range of missionary encounters as well as aspects of conversion and anti conversion in different parts of the region thus challenging the problematic idea that religious life after socialism involved a simple revival of repressed religious traditions Instead they unravel the unexpected twists and turns of religious dynamics and the processes that have challenged popular ideas about religion and culture The contributions show how conversion is rooted in the disruptive qualities of the new capitalist experience and document its unsettling effects on the individual and social level

Conversion Linda van de Kamp, 2016 Examines Pentecostal conversion as a force of change revealing new insights into its dominant role in global Christianity today There has been an extraordinary growth in Pentecostalism in Africa with Brazilian Pentecostals establishing new transnational Christian connections initiating widespread changes not only in religious practice but in society This book describes its rise in Maputo capital of Mozambique and the sometimes dramatic impact of Pentecostalism on women Here large numbers of urban women are taking advantage of the opportunities Pentecostalism offers to overcome restrictions at home pioneer new life spaces and change their lives through the power of the Holy Spirit Yet conversion can also mean a violent rupturing with tradition with family and with social networks As the pastors encourage women to cut their ties with the past including ancestral spirits they come to see their kin and husbands as imbued with evil powers and many leave their families Conquering spheres that used to be forbidden to them they often live alone as unmarried women sometimes earning more than men of a similar age They are also expected to donate huge sums

to the churches often money that they can ill afford bringing new hardships Linda van de Kamp is Assistant Professor in the Department of Sociology University of Amsterdam The Netherlands

Ruptures Martin Holbraad,Bruce Kapferer,Julia F. Sauma,2019-06-25 Ruptures brings together leading and emerging international anthropologists to explore the concept of rupture Understood as radical and often forceful forms of discontinuity rupture is the active ingredient of the current sense of a world in turmoil lying at the heart of some of the most defining experiences of our time the rise of populist politics the corollary impulse towards protest and even revolutionary change as well as moves towards violence and terror and the responses these moves elicit Rupture is addressed in selected ethnographic and historical contexts images of the guillotine in the French revolution reactions to Trump s election in the USA the motivations of young Danes who join ISIS in Syria butterfly effect activism among environmental anarchists in northern Europe the experiences of political trauma and its repair through privately sponsored museums of Mao s revolution

in China people's experience of the devastating 2001 earthquake in Gujarat the inner rupture of Protestant faith among Danish nationalist theologians and the attempt to invent ex nihilo an alphabet for use in Christian prophetic movements in Congo and Angola Ruptures takes in new directions broader intellectual debates about continuity and change In particular by thematising rupture as a radical sometimes violent and even brutal form of discontinuity it adds a sharper critical edge to contemporary discourses both in social theory and public debate and policy **The Guide to Clinical Preventive Services**

Remaking Indigeneity in the Amazon Esteban Roza, 2023-09-28 Drawing on archival and ethnographic work this book analyzes how indigeneity Christianity and state making became intertwined in the Colombian Amazon throughout the 20th century At the end of the 19th century the state gave Catholic missionaries tutelage over Indigenous groups and their territories but in the case of the Colombian Amazon this tutelage was challenged by evangelical missionaries that arrived in the region in the 1940s with different ideas of civilization and social change Indigenous conversion to evangelical Christianity caused frictions with other actors while Indigenous groups perceived conversion as way of leverage with settlers This book shows how evangelical Christianity shaped new forms of indigeneity that did not coincide entirely with the ideas of civilization or development that Catholic missionaries and the state promoted in the region Since the 1960s the state adapted development policies and programs to Indigenous realities and practices while Indigenous societies appropriated evangelical Christianity in order to navigate the changes brought on by colonization modernity and state formation This study demonstrates that not all projects of civilization were the same in Amazonia nor was missionization of Indigenous groups always subordinate to the state or resource extraction *Endovascular and Open Vascular Reconstruction* Sachinder Singh

Hans,2017-11-22 In recent years the growth in endovascular procedures has meant that vascular trainees may not gain sufficient experience to be competent in open vascular reconstructions following completion of their training At the same time many senior surgeons have somewhat limited experience of endovascular techniques This book will assist junior and senior surgeons and trainees in performing all types of vascular reconstructions A key feature of the book is its clear illustrations accompanied by pertinent case examples from vascular registries so that readers can perform these operations with clear understanding of anatomical exposure and dissection simplifying the conduct of the procedure Transnational Transcendence Thomas J. Csordas,2009 This innovative collection examines the transnational movements effects and transformations of religion in the contemporary world offering a fresh perspective on the interrelation between globalization and religion Taken as a whole Transnational Transcendence challenges some widely accepted ideas about this relationship in particular that international contemporary religious manifestations are secondary to the primary economic phenomenon of globalization P 4 of cover
