Abstract: The purpose of this study was to determine the effect of a 12-week training program on the physical fitness and health of sedentary, middle-aged men. The program consisted of three sessions per week, each lasting 45 minutes. The first session was a warm-up, the second was a cardiovascular workout, and the third was a strength training session. The results showed that the participants experienced significant improvements in their cardiovascular fitness, strength, and overall health. The study concluded that a 12-week training program can effectively improve the physical fitness and health of sedentary, middle-aged men.
