The Parachute Manual Dan Poynter,1977 Military Review ,1998 *Professional Journal of the United States Army* ,1998 Quarterly Review of Military Literature ,1998 **Handbook of Online Learning** Kjell Erik Rudestam,Judith Schoenholtz-Read,2002-02-19 I found the book excellent and read every one of the 450 pages Many of the chapters reflect the Fielding Institute s focus on human and organizational behaviour educational leadership and organizational management The book will be particularly appropriate for readers from a corporate training or business school background though there is much for academics and online educators at all levels and subject areas to learn from this well crafted book There are

many books and articles about online learning This is one of the better ones Robin Mason Computers and Education Technology mediated instruction has taken the university and the corporate sector by storm As more instructors teach online for a dispersed learning community in both academic and business environments there is a need for resources that will help them adapt to this new teaching method Educators who come out of traditional academic institutions tend to use traditional methods when offering courses online e g lectures textbooks and readings examinations rather than attend to small group processes and principles of what the editors of this volume call andragogy This Handbook goes beyond the mechanics of how to create and direct an online learning experience to consider such a new approach to pedagogy in doing so The editors primary purpose is to clarify the conceptual issues that underlie effective online teaching and to offer practical guidance to educators and corporate trainers who plan to teach in a virtual environment Their central tenet is the adoption of computer networks as the teaching vehicle of the future demands a re examination of our core beliefs about pedagogy and how students learn The transfer of a classroom curriculum into cyberspace is deceptively simple but doing so without an appreciation of the nuances and implications of learning online ignores not only the potential of this medium but the inevitable realities of entering it Rather than fear the challenges that new technology brings to systems of learning the editors hope to help instructors embrace it by re thinking how knowledge is acquired and how educational processes may be optimally designed in a new age of teaching and learning Features Benefits Part I provides an overview and includes discussion of the unique structural aspects of the electronic learning environment pedagogical issues curriculum design psychological and group dynamics and ethical issues Part II examines practical issues associated with implementing courses online both in the traditional university setting and in professional corporate training environments The book draws heavily on personal case examples many from The Fielding Graduate Institute s 26 years of teaching in nontraditional distributed learning environments

Context Sensitive Health Informatics and the Pandemic Boost Craig E. Kuziemy, Peter Elkin, Christian Nohr, 2023-07-15. The COVID 19 pandemic has accelerated the pace at which innovative health technologies are being designed, developed and implemented. This inevitably presents new risks and challenges, not least how to ensure that these technologies are appropriate for particular environments. In this sense, environments may be people in various roles e.g. patients, users, designers, evaluators, or non-human constructs such as organizations, work practices, guidelines and protocols, buildings and markets. This book presents papers from CSHI 2023, the latest in the series of biennial conferences on Context Sensitive Health Informatics held in Sydney, Australia, on 5 and 6 July 2023. The theme of CSHI 2023 was Context Sensitive Health Informatics and the Pandemic Boost, and the book includes 19 papers and 7 poster abstracts covering a variety of topics. These are divided into 5 sections: clinician perceptions and use of health technologies; workforce development in health informatics; aligning workflows and work systems to health technologies; co-design, equitable evaluation and sustainable implementation of digital health tools and big data; and information management. The book provides an overview of the latest health information systems and of recent research in the area of context and health information technologies and will be of interest to all those working in the field of health informatics.

Piracy and Maritime Terrorism: Logistics, Strategies, Scenarios Silvia Ciotti Galletti, 2012-04-15. For much of history, pirates and buccaneers constituted one of the most serious threats to maritime activities all over the world. More recently, apart from adventure stories and swashbuckling films, maritime piracy was largely thought of as a thing of the past. This began to change in 1994 when an article in the *Far Eastern Economic Review* drew public attention to the renaissance of a phenomenon: piracy was back, and it was becoming increasingly violent, involving huge ships in international waters. This book is based on the proceedings of the NATO Advanced Research Workshop held in 2009 in Lisbon, Portugal. Its main purpose was to promote dialogue on the phenomenon of maritime piracy between international policymakers, law enforcement officers, port authorities and other professionals, and to provide a response to the need for research and analysis at an international level on maritime piracy and its connection to terrorism. The book does not simply report on the proceedings of the workshop but also includes some new topics not covered by the ARW and is organized in three sections: new methodological approaches to maritime threats; new threats and new challenges in piracy and maritime terrorism; and lastly, some selected case studies, different threats, different solutions. The book offers qualified ideas, opinions and talking points to the international practitioner community, will foster debate and help law enforcement agencies and policymakers to

face the new world wide maritime threats of piracy and terrorism The Caring Class Richard Schweid,2021-03-15 The number of elderly and disabled Americans in need of home health care is increasing annually even as the pool of people almost always women willing to do this job gets smaller and smaller The Caring Class takes readers inside the reality of home health care by following the lives of women training and working as home health aides in the South Bronx Richard Schweid examines home health care in detail focusing on the women who tend to our elderly and disabled loved ones and how we fail to value their work They are paid minimum wage so that we might be absent getting on with our own lives The book calls for a rethinking of home health care and explains why changes are urgent the current system offers neither a good way to live nor a good way to die By improving the job of home health aide Schweid shows we can reduce income inequality and create a pool of qualified competent home health care providers who would contribute to the well being of us all The Caring Class also serves as a guide into the world of our home health care system Nearly 50 million US families look after an elderly or disabled loved one This book explains the issues and choices they face Schweid explores the narratives histories and people behind home health care in the United States examining how we might improve the lives of both those who receive care and those who provide it The Encyclopedia of Elder Care Eugenia L.
