Confronting Colonial Objects Carsten Stahn,2024-05-23 The treatment of cultural colonial objects is one of the most debated questions of our time Calls for a new international cultural order go back to decolonization However for decades the issue has been treated as a matter of comity or been reduced to a Shakespearean dilemma to return or not to return Confronting Colonial Objects seeks to go beyond these classic dichotomies and argues that contemporary practices are at a tipping point The book shows that cultural takings were material to the colonial project throughout different periods and went far beyond looting It presents micro histories and object biographies to trace recurring justifications and contestations of takings and returns while outlining the complicity of anthropology racial science and professional networks that enabled colonial collecting The book demonstrates the dual role of law and cultural heritage regulation in facilitating colonial injustices and mobilizing resistance thereto Drawing on the interplay between justice ethics and human rights Stahn develops principles of relational cultural justice He challenges the argument that takings were acceptable according to the standards of the time and outlines how future engagement requires a re invention of knowledge systems and relations

towards objects including new forms of consent provenance research and partnership and a re thinking of the role of museums themselves Following the life story and transformation of cultural objects this book provides a fresh perspective on international law and colonial history that appeals to audiences across a variety of disciplines This is an open access title available under the terms of a CC BY NC ND 4 0 International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations April 2023 - Surplus Record Machinery & Equipment Directory Thomas M.
