Schor, 2008-12-02 The lowdown on long term care from a geriatric specialist with over twenty years in the field Placing loved ones in nursing homes or other long term care facilities is a stressful decision and for good reason In previous decades some homes were plagued by scandal and everyone wants to know that their family members will be safe and sound even when they can't be nearby all the time Here prominent geriatrician Joshua Schor M D guides the reader through this emotionally challenging process step by step covering such topics as The small and revealing details to watch for when touring a home Determining whether a family member needs long term or sub acute care Deciding whether assisted living may be a viable alternative Questions to ask about medications meals and activities Knowing your rights and getting the information you need Special concerns for younger patients And more      *The Patient's Guide to Preventing Medical Errors* Karin J. Berntsen, 2004-10-30 A nation watched in horror as 17 year old Jessica Santillian died needlessly after a heart lung transplant in 2003 She had been given organs with the wrong blood type That error killed her It is just one among tens of thousands of less publicized errors that occur in U S hospitals each year Author Karin Berntsen a veteran of the hospital and health care industry takes us through the headlines and the events never publicized into hospital wards and surgical rooms to see how errors are made causing disability or death She gives graphic examples of actual events that illustrate the problems cited in a federal Institute of Medicine report showing medical errors in the hospital cause 44 000 to 98 000 deaths each year Those errors include medication mistakes wrong site or side surgery and botched transfusions Berntsen explains why these are not just human errors with one or two people responsible they are systems failures that require a major culture change to remedy And that change she argues may not come without action by the very people the medical system is designed to help patients She offers clear actions consumers can take to assure they are not on the receiving end of a medical error The book details over 200 tips for improving patient safety U S hospitals have countless stories of miraculous healing and recovery the greatest technology most advanced medicines and best research in the world On the other hand we have a system where medical errors bring more than 120 fatalities each day across the country in hospitals An airline crash causing that many deaths daily would paralyze that

industry But because the deaths and harm are diluted across and deep within the silence of hospitals it is easier to be complacent There is says Berntsen an urgent need to pause and take inventory a need for clinicians and consumers to come together as partners for change     Medicaid: Medical Review in Skilled Nursing Homes and Mental Hospitals United States.
