**Cool** Salvatore Basile,2014-09-01 It's a contraption that makes the lists of Greatest Inventions Ever at the same time it's accused of causing global disaster It has changed everything from architecture to people's food habits to their voting patterns to even the way big business washes its windows It has saved countless lives while causing countless deaths Most of us are glad it's there But we don't know how or when it got there It's air conditioning For thousands of years humankind attempted to do something about the slow torture of hot weather Everything was tried water power slave power electric power ice made from steam engines and cold air made from deadly chemicals zephyrifiers refrigerated beds ventilation amateurs and professional air sniffers It wasn't until 1902 when an engineer barely out of college developed the Apparatus for Treating Air a machine that could actually cool the indoors and everyone assumed it would instantly change the world That wasn't the case There was a time when people ignored hot weather while reading each day's list of heat related deaths women wore furs in the summertime heatstroke victims were treated with bloodletting and the notion of a machine to cool the air was considered preposterous even sinful The story of air conditioning is actually two stories the struggle to perfect a cooling device and the effort to convince people that they actually needed such a thing With a cast of characters ranging from Leonardo da Vinci and Richard Nixon to Felix the Cat Cool showcases the myriad reactions to air conditioning some of them dramatic many others comical and wonderfully inconsistent as it was developed and presented to the world Here is a unique perspective on air conditioning's fascinating history how we rely so completely on it today and how it might change radically tomorrow
