Anderson, Paul Krugman, Robin Wells, 2015-03-16

**The Dao of Capital** Mark Spitznagel, 2013-08-16 As today's preeminent doomsday investor Mark Spitznagel describes his Daoist and roundabout investment approach one gains by losing and loses by gaining This is Austrian Investing an archetypal counterintuitive and proven approach gleaned from the 150 year old Austrian School of economics that is both timeless and exceedingly timely In The Dao of Capital hedge fund manager and tail hedging pioneer Mark Spitznagel with one of the top returns on capital of the financial crisis as well as over a career takes us on a gripping circuitous journey from the Chicago trading pits over the coniferous boreal forests and canonical strategists from Warring States China to Napoleonic Europe to burgeoning industrial America to the great economic thinkers of late 19th century Austria We arrive at his central investment methodology of Austrian Investing where victory comes not from waging the immediate decisive battle but rather from the roundabout approach of seeking the intermediate positional advantage what he calls shi of aiming at the indirect means rather than directly at the ends The monumental challenge is in seeing time differently in a whole new intertemporal dimension one that is so contrary to our wiring Spitznagel is the first to condense the theories of Ludwig von Mises and his Austrian School of economics into a cohesive and as Spitznagel has shown highly effective investment methodology From identifying the monetary distortions and non randomness of stock market routs Spitznagel's bread and butter to scorned highly productive assets in Ron Paul's words from the foreword Spitznagel brings

Austrian economics from the ivory tower to the investment portfolio The Dao of Capital provides a rare and accessible look through the lens of one of today's great investors to discover a profound harmony with the market process a harmony that is so essential today

**The Nature of Socialist Economics** Peter Murrell, 2014-07-14 What are the sources of the well known differences in the performance of capitalist and socialist economic systems Peter Murrell argues that the Schumpeterian model has far more power to answer this question than does the neoclassical theory generally used for that purpose The neoclassical theory focuses on the absence of a price system and the inability of a centralized system to allocate resources efficiently while the Schumpeterian model emphasizes the rigidity of institutions and policies in socialist economies and their lack of mechanisms either to create new institutions or to identify and to foster the growth of the most efficient organizations including multinational corporations In a work that will have profound consequences for the analysis of economic reform in socialist economies Murrell compares the predictions of these two models against data summarizing foreign trade performance and finds the Schumpeterian model clearly superior Combining international trade theory and econometric techniques the author develops new methods of comparative economic analysis These methods provide new information on the values of eleven resource endowments implicit in trade the degree to which the socialist countries fit standard models of trade the effect of multinational corporations on trade and myriad other features of economic performance Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
