**Weaving Sacred Stories** Laura Weigert, 2004 Spanning the backs of choir stalls above the heads of the canons and their officials large scale tapestries of saints' lives functioned as both architectural elements and pictorial narratives in the late Middle Ages In an extensively illustrated book that features sixteen color plates

Laura Weigert examines the role of these tapestries in ritual performances. She situates individual tapestries within their architectural and ceremonial settings, arguing that the tapestries contributed to a process of storytelling in which the clerical elite of late medieval cities legitimated and defended their position in the social sphere. Weigert focuses on three of the most spectacular and little studied tapestry series preserved from the fifteenth and early sixteenth centuries: *Lives of Saints Piat and Eleutherius*, *Notre Dame Tournai*, *Life of Saint Steven*, *Saint Steven Auxerre* (now in the Musée du Moyen Âge, Paris), and *Life of Saints Gervasius and Protasius*, *Saint Julien Le Mans*. Each of these tapestries, measuring over forty meters in length, included elements that have traditionally been defined as either lay or clerical. On the prescribed days when the tapestries were displayed, the liturgical performance for which they were the setting sought to merge the history and patron saint of the local community with the universal history of the Christian church. Weigert combines a detailed analysis of the narrative structure of individual images with a discussion of the particular social circumstances in which they were produced and perceived. *Weaving Sacred Stories* is thereby significant not only to the history of medieval art but also to art history and cultural studies in general.

*Online Learning and Community Cohesion* Roger Austin, Bill Hunter, 2013-07-04 National governments and multi-national institutions are spending unprecedented amounts of money on ICT to improve the overall quality of school learning, and schools are increasingly expected to prepare young people for a global economy in which inter-cultural understanding will be a priority. This book explores and analyzes the ways ICT has been used to promote citizenship and community cohesion in projects that link together schools in different parts of the world. It examines the theoretical framework behind such work and shows the impact of initiatives in the Middle East, Canada, the USA, England, Northern Ireland, the Republic of Ireland, and elsewhere in the European Union. This is a critical examination of the technologies that have been deployed, the professional development that has been provided, and an evaluation of what constitutes good practice, particularly in terms of what collaborative learning really means for young people. Many of these initiatives have enabled young people to develop more positive relations with culturally and religiously different neighbours, but this work has just begun. Continuing international tensions over matters of identity and faith require that we better understand the political context for such work so that we might shape future directions more deliberately and more clearly.

Prehistoric Europe Timothy Champion, 2016-06-16 The study of European prehistory has been revolutionized in recent years by the rapid growth rate of archaeological discovery, advances in dating methods, and the application of scientific techniques to archaeological material.
