Physical Chemistry Levine 4th Edition:

Physical Chemistry Robert G. Mortimer, 2000-04-28 This new edition of Robert G Mortimer's Physical Chemistry has been thoroughly revised for use in a full year course in modern physical chemistry In this edition Mortimer has included recent developments in the theories of chemical reaction kinetics and molecular quantum mechanics as well as in the experimental study of extremely rapid chemical reactions While Mortimer has made substantial improvements in the selection and updating of topics he has retained the clarity of presentation the integration of description and theory and the level of rigor that made the first edition so successful Emphasizes clarity every aspect of the first edition has been examined and revised as needed to make the principles and applications of physical chemistry as clear as possible Proceeds from fundamental principles or postulates and shows how the consequences of these principles and postulates apply to the chemical and physical phenomena being studied Encourages the student not only to know the applications in physical chemistry but to understand where they come from Treats all topics relevant to undergraduate physical chemistry

Physical Chemistry for the Biosciences, second edition Raymond Chang, Charles M. Lovett, 2025-02-25 Physical Chemistry for the Biosciences has been optimized for a one semester course in physical chemistry for students of biosciences or a course in biophysical chemistry Most students enrolled in this course have taken general chemistry organic chemistry and a year of physics and calculus Fondly known as Baby Chang this best selling text is back in an updated second edition for the one semester physical chemistry course Carefully crafted to match the needs and interests of students majoring in the life sciences Physical Chemistry for the Biosciences has been revised to provide students with a sophisticated appreciation for physical chemistry as the basis for a variety of interesting biological phenomena Major changes to the new edition include Discussion of intermolecular forces in chapter Detailed discussion of protein and nucleic acid structure providing students with the background needed to fully understand the biological applications of thermodynamics and kinetics described later in the book Expanded and updated descriptions of biological examples such as protein misfolding diseases photosynthesis and vision

Physical Chemistry for the Chemical and Biological Sciences Raymond Chang, 2000-05-12 Hailed by advance reviewers as a kinder gentler P Chem text this book meets the needs of an introductory course on physical chemistry and is an ideal choice for courses geared toward pre medical and life sciences students Physical Chemistry for the Chemical and Biological Sciences offers a wealth of applications to biological problems numerous worked examples and around 1000 chapter end problems

Experimental Physical Chemistry Arthur Halpern, George McBane, 2006-06-30 Experimental Physical Chemistry includes complete lists of necessary materials detailed background material for each experiment and relevant sections on measurements and error analysis

Physical Chemistry for the Biosciences Raymond Chang, 2005-02-11 This book is ideal for use in a one semester introductory course in physical chemistry for students of life sciences The author's aim is to emphasize the understanding of physical concepts rather than focus on precise mathematical

development or on actual experimental details Subsequently only basic skills of differential and integral calculus are required for understanding the equations The end of chapter problems have both physiochemical and biological applications

Physical Chemistry for the Chemical Sciences Raymond Chang, 2014-06-15 Following in the wake of Chang's two other best selling physical chemistry textbooks *Physical Chemistry for the Chemical and Biological Sciences* and *Physical Chemistry for the Biosciences* this new title introduces laser spectroscopist Jay Thoman Williams College as co author Following in the wake of Chang's two other best selling physical chemistry textbooks *Physical Chemistry for the Chemical and Biological Sciences* and *Physical Chemistry for the Biosciences* this new title introduces laser spectroscopist Jay Thoman Williams College as co author This comprehensive new text has been extensively revised both in level and scope Targeted to a mainstream physical chemistry course this text features extensively revised chapters on quantum mechanics and spectroscopy many new chapter ending problems and updated references while biological topics have been largely relegated to the previous two textbooks Other topics added include the law of corresponding states the Joule Thomson effect the meaning of entropy multiple equilibria and coupled reactions and chemiluminescence and bioluminescence One way to gauge the level of this new text is that students who have used it will be well prepared for their GRE exams in the subject Careful pedagogy and clear writing throughout combine to make this an excellent choice for your physical chemistry course
