Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1975 *Current Index to Journals in Education*, 1989 Make It New Barry M. Katz, 2015-09-04. The role of design in the formation of the Silicon Valley ecosystem of innovation. California's Silicon Valley is home to the greatest concentration of designers in the world: corporate design offices at flagship technology companies and volunteers at nonprofit NGOs, global design consultancies, and boutique studios, research laboratories, and academic design programs. Together they form the interconnected network that is Silicon Valley. Apple products are famously Designed in California, but as Barry Katz shows in this first ever extensively illustrated history, the role of design in Silicon Valley began decades before Steve Jobs and Steve Wozniak dreamed up Apple in a garage. Offering a thoroughly original view of the subject, Katz tells how design helped transform Silicon Valley into the most powerful engine of innovation in the world. From Hewlett Packard and Ampex in the 1950s to Google and Facebook today, design has provided the bridge between research and development, art and engineering, technical performance and human behavior. Katz traces the origins of all of the leading consultancies, including IDEO, frog, and Lunar, and shows the process by which some of the world's most influential companies came to place design at the center of their business strategies. At the same time, universities, foundations, and even governments have learned to apply design thinking to their missions. Drawing on unprecedented access to a vast array of primary sources and interviews with nearly every influential design leader, including Douglas Engelbart, Steve Jobs, and Don Norman, Katz reveals design to be the missing link in Silicon Valley's ecosystem of innovation.
