Blasko, 2013-06-17 The Chinese Army Today is a comprehensive study of the Chinese military examining its ground forces in a level of detail not found in any other contemporary works This new revised edition has been fully updated to take account of recent changes in the institution In 1999 the military modernization program of the Chinese People s Liberation Army increased in intensity and achieved a focus not seen in the previous two decades Based primarily on actual Chinese sources this book details these changes and puts them in the context of the many traditions that still remain Written by a retired professional military officer who has served in China the text uses first hand observation of the Chinese military and three decades of military experience to weave many disparate threads from official Chinese statements documents and media reports into an integrated whole The author also conducts an in depth exploration into the many forces that constitute the People s Liberation Army This is an essential book for all students of Chinese military and security affairs and highly recommended for students of Chinese Politics Asian Security and International Relations and Strategic Studies in general

Higher Education in the Global Age Daniel Araya, Peter Marber, 2013-11-20 Discussions on globalization now routinely focus on the economic impact of developing countries in Asia Africa the Middle East the former Soviet Union and Latin America Only twenty five years ago many developing countries were largely closed societies Today the growing power of emerging markets is reordering the geopolitical landscape On a purchasing power parity basis emerging economies now constitute half of the world s economic activity Financial markets too are seeing growing integration Asia now accounts for 1 3 of world stock markets more than double that of just 15 years ago Given current trajectories most economists predict that China and India alone will account for half of global output by 2050 almost a complete return to their positions prior to the Industrial Revolution How is higher education shaping and being shaped by these massive tectonic shifts As education rises as a geopolitical priority it has converged with discussions on economic policy and a global labor market As part of the Routledge Studies in Emerging Societies series this edited collection focuses on the globalization of higher education particularly the increasing symbiosis between advanced and developing countries Bringing together senior scholars journalists and practitioners from around the world this collection explores the relatively new and changing higher education landscape CTET Success Master Social Science/Studies Paper-2 for Class 6 to 8 2020 Arihant Experts, 2020-01-02

Throughout the world teaching is looked at as one of the most respected and noble profession a person could have A great

teacher not only shows the right path that a student should follow but also prepares the human resources for the further development of the nation Among various exams CTET is the most popular teaching exam in the country Central Teaching Eligibility Test CTET is a national level test conducted by CBSE twice a year to recruit the eligible candidates as teacher The exam is conducted into 2 papers Paper 1 for class 1 5 and Paper 2 for class 6 8 Any candidate who is interested to become a teacher for classes 6 to 8 then they have to appear for both the papers The new the edition of Study Guide Success Master CTET Social Science Studies Paper II has been prepared completely on the latest exam pattern The book has been divided into 5 key sections and further divided into chapters providing the focused study material After covering theoretical part this book also concentrates on the practice part it provides Previous Years Solved Paper 2 practice sets and more than 3000 MCQs for thorough practice Ample numbers of questions have been given which are covered in a Chapterwise manner that allows candidates to understand the trend of the questions as well as the exam This book will prove to be highly useful for the CTET Paper 2 exam as it will help in achieving the good rank in the exam

Education in South-East Asia Lorraine Pe Symaco, 2013-02-14 Education in South East Asia is a comprehensive critical reference guide to education in South East Asia With chapters written by an international team of leading regional education experts the book explores the education systems of Brunei Darussalam Cambodia Indonesia Lao PDR Malaysia Myanmar the Philippines Singapore Thailand Timor Leste and Vietnam The diverse range and forms of culture religion and politics embedded in the region are exhibited in the distinctive education systems that inter relate in one of the most integrated regions in the world Including a comparative introduction to the issues facing education in the region as a whole and guides to available online datasets this Handbook will be an essential reference for researchers scholars international agencies and policy makers at all levels

Law in Transition Ruth Buchanan, Peer Zumbansen, 2014-12-01 Law has become the vehicle by which countries in the developing world including post conflict states or states undergoing constitutional transformation must steer the course of social and economic legal and political change Legal mechanisms in particular the instruments as well as concepts of human rights play an increasingly central role in the discourses and practices of both development and transitional justice These developments can be seen as part of a tendency towards convergence within the wider set of discourses and practices in global governance While this process of convergence of formerly distinct normative and conceptual fields of theory and practice has been both celebrated and critiqued at the level of theory the present collection provides through a series of studies drawn from a variety of contexts in which human rights advocacy and transitional justice initiatives are colliding with development projects programmes and objectives a more nuanced and critical account of contemporary developments The book includes essays by many of the leading experts writing at the

intersection of development rights and transitional justice studies Notwithstanding the theoretical and practical challenges presented by the complex interaction of these fields the premise of the book is that it is only through engagement and dialogue among hitherto distinct fields of scholarship and practice that a better understanding of the institutional and normative issues arising in contemporary law and development and transitional justice contexts will be possible The book is designed for research and teaching at both undergraduate and graduate levels

ENDORSEMENTS An extraordinary collection of essays that illuminate the nature of law in today's fragmented and uneven globalized world by situating the stakes of law in the intersection between the fields of human rights development and transitional justice Unusual for its breadth and the quality of scholarly contributions from many who are top scholars in their fields this volume is one of the first that attempts to weave the three specialized fields and succeeds brilliantly For anyone working in the fields of development studies human rights or transitional justice this volume is a wake up call to abandon their preconceived ideas and frames and aim for a conceptual and programmatic restart

Professor Balakrishnan Rajagopal Ford International Associate Professor of Law and Development Massachusetts Institute of Technology This superb collection of essays explores the challenges possibilities and limits faced by scholars and practitioners seeking to imagine forms of law that can respond to social transformation Drawing together cutting edge work across the three dynamic fields of law and development transitional justice and international human rights law this volume powerfully demonstrates that in light of the changes demanded of legal research education and practice in a globalizing world all law is law in transition

Anne Orford Michael D Kirby Chair of International Law and Australian Research Council Future Fellow University of Melbourne A terrific volume Leading scholars of human rights development policy and transitional justice look back and into the future What has worked Where have these projects gone astray or conflicted with one another Law will only contribute forcefully to justice development and peaceful sustainable change if the lessons learned here give rise to a new practical wisdom We all hope law can do better the essays collected here begin to show us how

David Kennedy Manley O Hudson Professor of Law Director Institute for Global Law and Policy Harvard Law School

interventions are both effective and efficient Overcoming Disadvantage in Education is unique in the way that it Shows where the solutions to underachievement and poverty lie combines primary new secondary official and published review evidence distinguishes between those possible causes of underachievement that are largely fixed for individuals and those that are modifiable There are evidence informed ways forward in handling under achievement and increasing social justice in education This book shows which the more likely approaches are and where further work could yield further benefits This book will be a key text for students developing academic researchers and supervisors in the social sciences and for those research users charged with improving educational outcomes

Brain Connectivity Analysis: Investigating Brain Disorders Barry Horwitz, Silvina G. Horovitz, In the last few years advances in human structural and functional neuroimaging fMRI PET EEG MEG have resulted in an explosion of studies investigating the anatomical and functional connectivity between different regions of the brain More and more studies have employed resting and task related connectivity analyses to assess functional interactions and diffusion weighted tractography to study white matter organization Many of these studies have addressed normal human function but recently a number of investigators have turned their attention to examining brain disorders The study of brain disorders is a complex endeavor not only does it require understanding the normal brain and the regions involved in a particular function but also it needs a deeper understanding of brain networks and their dynamics This Research Topic will provide the scientific community with an overview of how to apply connectivity methods to study brain disease and with perspectives on what are the strength and limitations of each modality For this Research Topic we solicit both reviews and original research articles on the use of brain connectivity analysis with non human or human models to explore neurological psychiatric developmental and neurodegenerative disorders from a system perspective Connectivity studies that have focused on one or more of the following will be of particular interest 1 detection of abnormal functional structural connectivity 2 neural plasticity assessed by changes in connectivity in patients with brain disorders 3 assessment of therapy using connectivity measures 4 relation of connectivity changes to behavioral changes
