Pavement Engineering Rajib B. Mallick, Tahar El-Korchi, 2013-03-27

Pavements are engineered structures essential to transportation commerce and trade and everyday life. In order for them to perform as expected they must be designed, constructed, maintained, and managed properly. Providing a comprehensive overview of the subject, *Pavement Engineering: Principles and Practice*, Second Edition, covers a wide range of topics in asphalt and concrete pavements from soil preparation to structural design and construction. This new edition includes updates in all chapters and two new chapters on emerging topics that are becoming universally important: engineering of sustainable pavements and environmental mitigation in transportation projects. It also contains new examples and new figures with more informative schematics as well as helpful photographs. The text describes the significance of standards and examines traffic drainage, concrete mixes, asphalt binders, distress, and performance in concrete and asphalt pavements and pavement maintenance and rehabilitation. It also contains a chapter on airport pavements and discusses nondestructive tests for pavement engineering using nuclear deflection, based electromagnetic, and seismic equipment. The authors explore key concepts and techniques for economic analysis and computing life cycle cost, instrumentation for acquiring test data, and specialty applications of asphalt and concrete. The Second Edition includes more relevant issues and recently developed techniques and guidelines for practical problems such as selection of pavement type, effect of vehicle tires, and use of smart sensors in rollers and software for drainage analysis. This book presents in depth state of the art knowledge in a range of relevant topics in pavement engineering with numerous examples and figures and comprehensive references to online resources for literature and software. It provides a good understanding of construction practices essential for new engineers and materials processing and construction needed for solving numerous problems.
