Excellence Gaps in Education Jonathan A. Plucker, Scott J. Peters, 2020-01-15 2017 Texas Association for Gifted and Talented Legacy Scholar Book Award 2017 National Association of Gifted Children Scholar Book of the Year Award In *Excellence Gaps in Education* Jonathan A Plucker and Scott J Peters shine a spotlight on excellence gaps the achievement gaps among subgroups of students performing at the highest levels of achievement Much of the focus of recent education reform has been on closing gaps in achievement between students from different racial ethnic or socioeconomic backgrounds by bringing all students up to minimum levels of proficiency Yet issues related to excellence gaps have been largely absent from discussions about how to improve our schools and communities Plucker and Peters argue that these significant gaps reflect the existence of a persistent talent underclass in the United States among African American Hispanic Native American and poor students resulting in an incalculable loss of potential among our fastest growing populations Drawing on the latest research and a wide range of national and international data the authors outline the scope of the problem and make the case that excellence gaps should be targeted for elimination They identify promising interventions for talent development already underway in schools and provide a detailed review of potential strategies including universal

Prescott,2018-11-21 The gender differentiated and more severe impacts of armed conflict upon women and girls are well recognised by the international community as demonstrated by UN Security Council Resolution UNSCR 1325 on Women Peace and Security and subsequent resolutions Similarly the development community has identified gender differentiated impacts upon women and girls as a result of the effects of climate change Current research and analysis has reached no consensus as to any causal relationship between climate change and armed conflict but certain studies suggest an indirect linkage between climate change effects such as food insecurity and armed conflict Little research has been conducted on the possible compounding effects that armed conflict and climate change might have on at risk population groups such as women and girls Armed Conflict Women and Climate Change explores the intersection of these three areas and allows the reader to better understand how military organisations across the world need to be sensitive to these relationships to be most effective in civilian centric operations in situations of humanitarian relief peacekeeping and even armed conflict This book examines strategy and military doctrine from NATO the UK US and Australia and explores key issues such as displacement food and energy insecurity and male out migration as well as current efforts to incorporate gender considerations in military activities and operations This innovative book will be of great interest to students and scholars of international relations international development international security sustainability gender studies and law Military Review ,2014 **Journal of Developmental Education** ,2015
