Professionalizing Teacher Education Claire Wyatt-Smith, Lenore Adie, Michele Haynes, Chantelle Day, 2022-06-30 This book provides a significant contribution to conversations about teacher quality and graduate readiness for teaching. It presents empirical insights into how a multidisciplinary team of researchers, teacher educators, and policy personnel mobilized for collective change in a standards-driven reform initiative. The insights are research-informed and critically relevant for anyone interested in teacher preparation and credentialing. It gives an account of a bold move to install a collaborative culture of evidence-informed inquiry to professionalize teacher education. The centerpiece of the book is the use of standards and evidence to show the quality of graduates entering the teaching workforce. The book presents for the first time a model of online cross-institutional moderation as benchmarking to generate large-scale evidence of the quality of teacher education. The book also introduces a new conceptualization of a feedback loop using summative data for accountability and formative data to inform curriculum review and program renewal. This book offers the insider story of the conceptualization, design, and implementation of the Graduate Teacher Performance Assessment (GTPA). It involves going to scale with a large group of Australian universities, government agencies, and schools and using participatory approaches to advance new thinking about evidence-informed inquiry, cross-institutional moderation, and innovative digital infrastructure. The discussion of competence assessment standards and change processes presented in the book has relevance beyond teacher education to other professions. *Brockport Physical Fitness Test Manual* Winnick, Joseph P., Short, Francis, 2014-06-06 The Brockport Physical Fitness Test revolutionized fitness testing for youngsters with disabilities when it first came out in 1999.
