- 2) List the six interrogatory investigative questions.
- 3) Understand formats for basic incident reports.
- 4) Discuss aids to information gathering.
- 5) Summarize report approval and disposition processes.
- 6) List elements common to incident reports.
- 7) Explain techniques involved in writing effective reports.

Overview

Field notes play a significant role in every criminal investigation. They provide a short written record of events, times, places, suspects, witnesses, and other information, and they are used as the basis of incident/offense reports. The importance of taking effective and complete notes in every investigation, regardless of the offense, should not be underestimated. Because field notes are more reliable than a person's memory, they can be used as a source of specific facts and details that otherwise might be forgotten. Detailed field notes also reduce the need to recontact victims and witnesses regarding information that was overlooked or questions that were not asked in the initial contact. Moreover, it is not uncommon for officers to testify in court several months or years later regarding a particular investigation. Comprehensive field notes not only help refresh the investigator's memory but also strengthen his or her court testimony.

This chapter examines several aspects of the field note and report writing process. After discussing field notes and the basic and primary questions that need to be asked in an investigation, it addresses the importance of completing well-prepared incident/offense reports. Incident report formats vary among law enforcement agencies. Despite the variation, however, there are common elements that should be included in all reports. Investigators should gain as much information as possible when arriving at the crime scene. Even facts and details that seem unnecessary at first may later prove to be highly valuable for the investigation.

Aids to information are also discussed in this chapter. Investigators will often interview witnesses and victims who may be unable to provide or articulate important details. Visual and descriptive aids such as suspect description forms and photographs of weapons can improve the information-gathering process. After presenting a brief overview on the growing use of mobile data terminals and other computerized tools that facilitate the report-writing process, the chapter concludes with a discussion on how to write effective reports.

I. Field Notes

A. The Importance of Field Notes

Field notes are the shorthand written record made by police officers from the time they arrive at the scene until the assignment is completed. The following factors form the importance of field notes:

Sample Field Notes For Criminal Investigation:

Criminal Investigation Michael J. Palmiotto, Michael Palmiotto, 2004 Michael Palmiotto's Criminal Investigation is often described as one of the most realistic and accessible texts in the study of Criminal Justice. In this Third Edition, which has been substantially updated from previous editions, Palmiotto provides greater coverage of case screening, more sources of information, and in-depth analyses of special investigations.

Criminal Investigation, Fourth Edition Michael J. Palmiotto, 2012-06-25 Criminal investigators need broad knowledge of such topics as criminal law, criminal procedure, and investigative techniques. The best resource for these professionals will distill the needed information into one practical volume. Written in an accessible style, the fourth edition of Criminal Investigation maintains the same reader-friendly approach that made its predecessors so popular with students, professionals, and practitioners. Beginning with an overview of the history of criminal investigation, the book explores current investigative practices and the legal issues that constrain or guide them. It discusses the wide range of sources of information available, including the internet, individuals, state and local sources, and federal agencies and commissions. Next, the book discusses other investigative techniques, including interviewing and interrogation, informants, surveillance, and undercover operations. A chapter on report writing provides explicit instructions on how to capture the most critical information needed in an investigation. Additional chapters cover the crime scene investigation and the crime laboratory. The remainder of the book delves into the specific investigative protocols for individual crimes, including sex offenses, homicide, mass and serial murder, assault, and robbery, property crimes, cybercrime, and narcotics. Concluding chapters focus on the police-prosecutor relationship and investigative trends. Each chapter includes a summary, a list of key terms, and review questions so that readers can test their assimilation of the material. Clear and concise, this book is an essential resource for every criminal investigator's toolbox.

Report Writing for Crime Scene Investigators Laura Pazarena, Michael Kessler, Amy Watroba, 2022-06-29 Report Writing for Crime Scene Investigators provides students with the tools to write effective crime scene reports. Students looking to break into the field of crime scene investigations often take courses in report writing, but the textbooks available are commonly geared toward general law enforcement and first responders. However, none of the books on the market focus on the craft of effective informative writing with graphic crime scene-specific considerations in mind. While falling under law enforcement's purview, crime scene investigations fall within the forensic science field, and as such, the reporting required is more technical and often more scientific in nature than the average police report. Due to the lack of published resources and guidance in this critical area, there is no standard that currently exists for vital function within crime scene and investigative circles, and often the subject is given short shrift. This creates wide discrepancies among what students are being taught. This book is the first of its kind to provide students and those professionals and agencies in need of a blueprint with a resource to teach them the various types of reports and how to refer to scenarios and specific types of evidence to ensure that the report holds up under the process of
