Programming in Clinical Settings Lisa de Rijk, Richard Gray, Frank Bourke, 2022-01-11 Neurolinguistic Programming in Clinical Settings provides a theoretical framework for the clinical applications of Neurolinguistic Programming NLP protocols in mental health. It offers evidence based models for a range of conditions including PTSD, anxiety and depression, grief, phobias and binge eating. Providing a follow up to the 2014 book The Clinical Effectiveness of Neurolinguistic Programming, this book updates the existing research evidence for NLP interventions with mental health clinical conditions. It includes further evidence for its use with somatoform disorders, anxiety and depression and as a general psychotherapy modality. The book outlines up to date evidence from clinical trials that demonstrate the success rate of NLP with PTSD populations and discusses how ongoing randomised clinical trials at Kings College London are demonstrating the clinical effectiveness of NLP protocols and are becoming more widely accepted by mainstream mental health care. Written by a team of internationally academically informed clinicians and researchers, the book will be key reading for academics, researchers and post graduate students in the field of mental health research, psychotherapy and counselling. It will also be of interest to clinicians and mental health professionals interested in NLP as a therapeutic modality. The Love-Shy Survival Guide Talmer Shockley, 2009 The author explores the condition of love shyness, its links with Asperger's syndrome and how it differs from common forms of shyness. **Brave Enough to Begin** Kavitha Patil, 2025-06-10 Brave Enough to Begin is a tender empowering companion for women who are tired of surviving and are ready to heal gently.
