The Linear interpolation method sets a constant alteration rate from single key frame to key frame; this method is set by default. The Bezier interpolation method sets a smooth step-up from key frame to key frame that softly fades away. The Hold interpolation method abruptly changes to a chosen value without gradual transition.
Button Delete	Removes the effect from the item in your compilation. Not available for basic effects.

The following setting options are always available:

Button 	Enables / disables a transition temporarily.
Input field Duration	Displays and defines the duration of the transition. The duration is set to one second by default.
