Human and Machine Vision Virginio Cantoni, 2013-06-29 The following are the proceedings of the Third International Workshop on Perception held in Pavia Italy

on September 27-30 1993 under the auspices of four institutions: the Group of Cybernetic and Biophysics GNCB of the National Research Council CNR, the Italian Association for Artificial Intelligence AI-IA, the Italian Association of Psychology ALP and the Italian Chapter of the International Association for Pattern Recognition IAPR. The theme of this third workshop was Human and Machine Vision: Analogies and Divergencies. A wide spectrum of topics was covered ranging from neurophysiology to computer architecture to psychology to image understanding etc. For this reason the structure of this workshop was quite different from those of the first two held in Parma 1991 and Trieste 1992. This time the workshop was composed of just eight modules, each one consisting of two invited lectures dealing with vision in nature and machines respectively, and a common panel discussion including the two lecturers and three invited panellists.
