- » Only supported way to push data into PFS database outside of the standard user interface
- » Contains a utility (REST Tool) to guide developers how to interface their applications with Core LIMS database by interactively building code templates
- » The code templates are request and response calls written in JSON (JavaScript Object Notation)
- » Since JSON is a text format that is language independent, these code templates can then be incorporated into most developer applications
- » The code templates are stateless and there are no dependencies between multiple templates
