The Postgenomic Condition Jenny Reardon, 2017-12-29 Now that we have sequenced the human genome what does it mean In The Postgenomic Condition Jenny Reardon critically examines the decade after the Human Genome Project and the fundamental questions about meaning value and justice this landmark achievement left in its wake Drawing on more than a decade of research in molecular biology labs commercial startups governmental agencies and civic spaces Reardon demonstrates how the extensive efforts to transform genomics from high tech informatics practiced by a few to meaningful

knowledge beneficial to all exposed the limits of long cherished liberal modes of knowing and governing life Those in the American South challenged the value of being included in genomics when no hospital served their community Ethicists and lawyers charged with overseeing Scottish DNA and data questioned how to develop a system of ownership for these resources when their capacity to create things of value new personalized treatments remained largely unrealized Molecular biologists who pioneered genomics asked whether their practices of thinking could survive the deluge of data produced by the growing power of sequencing machines While the media is filled with grand visions of precision medicine The Postgenomic Condition shares these actual challenges of the scientists entrepreneurs policy makers bioethicists lawyers and patient advocates who sought to leverage liberal democratic practices to render genomic data a new source of meaning and value for interpreting and caring for life It brings into rich empirical focus the resulting hard on the ground questions about how to know and live on a depleted but data rich interconnected yet fractured planet where technoscience garners significant resources but deeper questions of knowledge and justice urgently demand attention

Digital Rhetoric Douglas Eyman, 2015-06-01 A survey of a range of disciplines whose practitioners are venturing into the new field of digital rhetoric examining the history of the ways digital and networked technologies inhabit and shape traditional rhetorical practices as well as considering new rhetorics made possible by current technologies *Power and Communication* Giovanni Ciofalo, Silvia Leonzi, Antonio Di Stefano, 2015-10-05 This book represents a significant contribution to the discussion on the part played by communication especially in its mediated forms in people's lives dwelling on the nature of the relationship between the notion of power and the media in current Western societies The media have dramatically increased their capacity to exercise their symbolic force over other fields of cultural production by partly structuring those intrinsic rules values and practices that organize for example the political system or the academic world from the inside On the other hand the media are intertwined environments subjected to the influence of other cultural economic and political forces which in turn reveal themselves to be capable of framing reality through the media themselves Particularly focusing on the topic of the economic crisis the various chapters of this edited volume highlight how the relationship between the media and other forces capable of pervasively exercising their power appears to be paradoxically as strict as it is opaque Social media and smart mobile technologies have increasingly affected the modalities whereby other institutions and organizations reflect on themselves and develop their worldviews At the same time however politics and economics experts and strategists have all learned how to exploit this potential for their own purposes Detecting the opacity that characterizes this form of exploitation is the first step in the acknowledgment of this phenomenon **Knowledge Economy and the City** Ali Madanipour, 2013-03-01 This book explores the relationship between space and economy the spatial expressions of the knowledge economy The capitalist industrial economy produced its own space which differed radically from its predecessor agrarian and mercantile economies If a new knowledge based economy is emerging it is similarly expected to produce its own space to suit the new circumstances of production and consumption If these spatial expressions do exist even if in incomplete and partial forms they are likely to be the model for the future of cities *The World Is Born From Zero* Cameron Kunzelman, 2022-07-18 The World is Born From Zero is an investigation into the relationship between video games and science fiction through the philosophy of speculation Cameron Kunzelman argues that

the video game medium is centered on the evaluation and production of possible futures by following video game studies media philosophy and science fiction studies to their furthest reaches Claiming that the best way to understand games is through rigorous formal analysis of their aesthetic strategies and the cultural context those strategies emerge from Kunzelman investigates a diverse array of games like *The Last of Us* *VA 11 Hall A* and *Civilization VI* in order to explore what science fiction video games can tell us about their genres their ways of speculating and how the medium of the video game does or does not direct us down experiential pathways that are both oppressive and liberatory Taking a multidisciplinary look at these games *The World is Born From Zero* offers a unique theorization of science fiction games that provides both science fiction studies and video game studies with new tools for thinking how this medium and mode inform each other *Inhuman Networks* Grant Bollmer, 2016-08-11 Social media's connectivity is often thought to be a manifestation of human nature buried until now revealed only through the diverse technologies of the participatory internet Rather than embrace this view *Inhuman Networks* Social Media and the Archaeology of Connection argues that the human nature revealed by social media imagines network technology and data as models for behavior online Covering a wide range of historical and interdisciplinary subjects Grant Bollmer examines the emergence of the network as a model for relation in the 1700s and 1800s and follows it through marginal often forgotten articulations of technology biology economics and the social From this history Bollmer examines contemporary controversies surrounding social media extending out to the influence of network models on issues of critical theory politics popular science and neoliberalism By moving through the past and present of network media *Inhuman Networks* demonstrates how contemporary network culture unintentionally repeats debates over the limits of Western modernity to provide an idealized future where the human is interchangeable with abstract flowing data connected through well managed distributed networks

Communication and Conflict in Multiple Settings Peter Bray, Marta Rzepecka, 2018-06-12 Communication decisively impacts upon all our lives This inherent need to connect may either be soothing or painful a source of intimate understanding or violent discord Consequently how it is brokered is challenging and often crucial in situations where those involved have quite different ways of being in and seeing the world Good communication is equated with skills that intentionally facilitate change the realisation of desirable outcomes and the improvement of human situations Withdrawal of communication or its intentional manipulation provokes misunderstanding mistrust and precipitates the decline into disorder This international collection of work specifically interrogates conflict as an essential outworking of communication and suggests that understanding of communication's potency in contexts of conflict can directly influence reciprocally positive outcomes
