

Network Design Proposal

PREPARED FOR ABC CORPORATION INC.

ARTICLE I. OVERVIEW/HISTORY

In the January 2009 account review, Crystal presented to ABC Corporation a network design that included visios and recommendations focused on replacing ABC Corporation's existing back-up Frame Relay network with a back-up MPLS network that could be utilized for more than network failover in the event of an outage. This "secondary" network would be capable of offloading existing data requirements and also have the flexibility to accommodate future growth and changes.

In the May 2009 account review, Crystal highlighted the January network recommendations and also addressed more current needs, such as bandwidth saturation and expansion of video requirements, with additional recommendations. The fundamental of the basic recommended solution, however remained intact.

The purpose of this document is to define the requirements, considerations, and overall design specifications so that vendors can be selected to provide the appropriate solutions.

ARTICLE II. BUSINESS REQUIREMENTS AND CONSIDERATIONS

1. MPLS secondary network that will back up the primary Qwest WAN at all locations that have five or more employees.
2. Utilize single router for both primary and secondary networks at remote locations.
3. Solution that will provide Internet access for guests, that is separate from ABC Corporation's production network(s).
4. Solution that will accommodate the bandwidth and priority required for data replication traffic between Pennsylvania and North Carolina that will not interrupt other production traffic.
5. Accommodate future growth in VoIP traffic on WAN.
6. Prioritization of Tier 1 and Tier 2 applications such as ERP, Email, and Time tracking.
