**The Manipulative Child** Ernest W. Swihart, Jr.,1998-03-02 Why do so many of our kids raised in the most affluent nation on earth fail to thrive and strive and enter adulthood lacking appropriate and effective coping skills Drs Swihart and Cotter have come up with a revolutionary theory on why our kids are having such a tough time of it today It is because we allow our children to manipulate us and the

world around them rather than teaching them how to respond to life and life's tough situations. The result is that manipulative behavior is directly tied to low self-esteem which only heightens its negative impact on kids, families and the larger communities we live in. The good news is that Drs Swihart and Cotter have created a radical and clinically proven program for breaking manipulative behavior and getting our kids back on track. The program teaches parents to say no without feeling guilty, to resist the urge to feel responsible for their child's happiness, to view their children as emotionally competent and resilient and most importantly to realize that effective parenting means allowing your child to make mistakes and develop a sense of competence which leads to enhanced self-esteem and an ability to live independently and successfully in the real world. Drawing on their twenty-five years in private practice, the authors illustrate their program with examples of successful kids as well as case studies of how parents have regained control and effectively blocked their children's manipulative behavior. The positive results will enlighten and even astound you and give you the tools needed to become a better parent.

*Helping Parents Help Their Kids* Ennio Cipani, 1999 *Helping Parents Help Their Kids* is a guide both for clinicians who help families and for parents who have children with behavior problems. The author provides three ways to address clinical issues in designing and implementing child behavior management plans: a general behavioral consultation model, a specific behavioral model and an empirically tested advice package for problems that can occur in different family contexts. Each chapter provides early research on a specific strategy and several forms to use in the clinical environment. Parents will find this book helpful because the information is presented in a user-friendly format. The author explains how parents can learn specific strategies to deal with six common problems. These problems include teaching both children and adolescents to comply with the rules of the house, dealing with disruptive behavior and addressing problems in school. *Helping Parents Help Their Kids* offers both clinicians and parents effective procedures without the technical jargon many typical behavioral texts use. Instead, the author explains these methods in common-sense terms that will be a welcome change for all who want to find solutions for their child's behavioral problems.
