Pat For Economics Grade 1:

Economics of Education Dominic J. Brewer, Patrick J. McEwan, 2010-01-26 A collection of short stand alone chapters divided into five sections including overview of the field private and social returns to human capital investments production costs and financing of education teachers and teacher labor markets and education markets choice and incentives The collection provides international perspectives that describe the origins of these subjects their major issues and proponents their landmark studies and opportunities for future research The 70 contributors are each well regarded economists whose research has advanced the topic on which they write and this book fulfills an undersupplied niche for a text in the economics of education The chapters come from the acclaimed International Encyclopedia of Education 3e 2010 edited by Eva Baker Barry McGaw and Penelope Peterson The Encyclopedia contains over 1 350 articles in 24 sections that stretch from educational philosophies and technologies to measurement leadership and national systems of education This single volume textbook presents a cohesive view of this increasingly important area of economics Superb contributions from well regarded economists convey unique and useful perspectives Chapters contain an extensive bibliography and further readings to enable interested researchers to extend their knowledge into each specific topic

Superintendent of Documents, 1896 Economic Evaluation in Education Henry M. Levin, Patrick J. McEwan, Clive Belfield, A. Brooks Bowden, Robert Shand, 2017-06-15 The past decade has seen increased attention to cost effectiveness and benefit cost analysis in education as administrators are being asked to accomplish more with the same or even fewer resources philanthropists are keen to calculate their return on investment in social programs and the general public is increasingly scrutinizing how resources are allocated to schools and colleges This text titled Cost Effectiveness Analysis in its previous editions is the only full length book to provide readers with the step by step methods they need to plan and implement a benefit cost analysis in education The authors examine a range of issues including how to identify measure and distribute costs how to measure effectiveness utility and benefits and how to incorporate cost evaluations into the decision making process The updates to the Third Edition reflect the considerable methodological development in the evaluation literature and the greater empiricism practiced by education researchers to help readers learn to apply more advanced methods to their own analyses SAGE congratulates author Henry M Levin winner of the 2017 AERA Distinguished Contributions to Research in Education Award
