Carving Status at Kūmgangsan Maya K. H. Stiller, 2021-12-17 North Korea's Kūmgangsan is one of Asia's most celebrated sacred mountain ranges comparable in fame to Mount Tai in China and Mount Fuji in Japan Carving Status at Kūmgangsan marks a paradigm shift in the research about East Asian mountains by introducing an entirely new field autographic rock graffiti The book details how late Chosŏn ca 1600 1900 CE Korean elite travelers used Kūmgangsan to demonstrate their high social status by carving inscriptions naming sites and joining the literary pedigree of visitors to renowned locales Such travel practices show how social competition emerged in the spatial context of a landscape Hence Carving Status at Kūmgangsan argues for an expansion of accepted historical narratives on travel and mountain space in premodern East Asia Rather than interpreting pilgrimage routes as exclusively religious or tourist in Kūmgangsan's case they were also an important site of collective memory Embarking on a journey to Kūmgangsan to view and contribute to its sites of memory was an endeavor that late Chosŏn Koreans hoped to achieve in their lives Based on multidisciplinary research drawing on literary writings court records gazetteers maps songs calligraphy and

paintings Carving Status at K mngansan is the first historical study of this practice It will appeal to scholars in fields ranging from East Asian history literature and geography to pilgrimage studies and art history *Oncology in the Precision Medicine Era* Ravi Salgia, 2019-12-17 This volume comprehensively reviews oncology in the precision medicine era of personalized care latest developments in the field and indications and clinical trials for the treatment of cancer with targeted therapies immunotherapy and epigenetic modulators It thoroughly addresses concerns of various types of cancers including cancers of the head and neck lung colon esophagus bladder pancreas and breast melanoma multiple myeloma hepatocellular carcinoma renal cell carcinoma and sarcomas It is organized and written in a format that is easy to follow for both clinicians and non clinical scientists interested in personalized medicine Chapters cover the identification of the clinical problem and summary of recent findings tumor biology and heterogeneity genomics examples of simple and complex cases biological pathways future clinical trials and financial considerations *Oncology in the Precision Medicine Era Value Based Medicine* will serve as a useful resource for medical oncologists and healthcare providers tailoring medicine to the needs of the individual patient from prevention and diagnosis to treatment and follow up *CMJ New Music Report* , 1999-06-14 *CMJ New Music Report* is the primary source for exclusive charts of non commercial and college radio airplay and independent and trend forward retail sales *CMJ's* trade publication compiles playlists for college and non commercial stations often a prelude to larger success *The Report: Thailand 2009* , 2009 **Mendelian Inheritance in Man** Victor A. McKusick, 1998-06-29 The twelfth edition of this classic reference work includes More than 2 000 new entries A total of more than 9 000 entries New features and enhancement of the familiar old features Mapping information on more than 4 000 genes of known function Information on specific point mutations responsible for more than 700 genetic disorders or neoplasms *Mendelian Inheritance in Man MIM* is a genetic knowledgebase that serves clinical medicine and biomedical research including the Human Genome Project It aims to be comprehensive not only complete but also collated integrated and interpreted authoritative not only accurate but also sound in its interpretations and judgements and timely not only up to date but also historically dimensioned From a review of the eleventh edition *Reproductive Toxicology* Even the convenience of computer based forms of *MIM* cannot eliminate the need for *MIM* in book form The preface provides a wonderful synopsis of human genetics The information contained in this text serves as a concise review for those with a genetics background From a review of the tenth edition *New England Journal of Medicine* Victor McKusick has been for all these years the shepherd of the development of the field of clinical genetics Perhaps his most important pragmatic achievement has been the 10 editions of *Mendelian Inheritance in Man* which rapidly became and has remained the principal source of information on inherited diseases for all clinical geneticists In addition to the erudite entries in the books the references given with each description represent a magnificent bibliography of clinical genetics With McKusick's leadership and continued interest in gene mapping the book also represents an important compendium of the location of genes on specific chromosomes The book is a

magnificent security blanket for the clinical geneticist and should be in the libraries not only of these specialists but also of all others who see patients with diseases that have genetic components *Diabetes Literature Index* ,1974 *Biology of Carcinogenesis* M.J. Waring,B.A. Ponder,2012-12-06 There is no shortage of books on cancer Why publish another Simply because the subject is important possibly the most important challenge facing medicine today and consequently the focus of one of the fastest growing areas of fundamental biological research The quest to understand and control cancer is so absorbing that from time to time we really need to pause for a moment and try to take stock of the situation Given the sheer breadth of cancer related research that is not an easy task This book together with its planned successors in the series Cancer Biology and Medicine represents our attempt to draw back from the bench or the bedside for a moment and take a slightly longer look at what we are doing what we are trying to do and where we stand It is impossible to be comprehensive or even representative of more than a fraction of relevant knowledge but that is no excuse for not trying to see things in perspective Accordingly we set out to persuade a number of our colleagues to join us in writing a book which might admit a little fresh air into the confined atmosphere within which we mostly work a glimpse perhaps of fresh vistas *Genetic Research Strategies in Psychobiology and Psychiatry* Elliot S. Gershon,1981 **Photographing Central Asia** Svetlana Gorshenina,Sergei Abashin,Bruno De Cordier,Tatiana Saburova,2022-09-06 This volume addresses new theoretical approaches in visual and memory studies that prompted to rethink of the photography of Russian Turkestan of the nineteenth and early twentieth centuries Attempts to relate the visual unknown documentations to postcolonial criticism also opened up new interpretive arenas helping to decentralize the analysis of the history of photography The aim of this volume is to interpret photography as a specific tool that reifies reality subjectively frames it and fits it into various political ideological commercial scientific and artistic contexts Without reducing the entire argument to the binary of photography and power the authors reveal the different modes of seeing that involve distinct cultural norms social practices power relations levels of technology and networks for circulating photography and that determined the manner of its re use in constructing various images of Central Asia The volume demonstrates that photography was the cornerstone of imperial media governance and discourse construction in colonial Turkestan of the tsarist and early Soviet periods The various cases show the complex mechanisms by which images of Turkestan were created remembered or forgotten from the nineteenth until the twenty first century The book should appeal to scholars of the Russian Empire and Central Asia of history of photography and visual culture of memory studies It should be appropriate for use in upper level undergraduate courses and even a broader public *Index Medicus* ,2001-07 Vols for 1963 include as pt 2 of the Jan issue Medical subject headings
