**American Metempsychosis** John Michael Corrigan, 2012-03-01 The transmigration of souls is no fable I would it were but men and women are only half human With these words Ralph Waldo Emerson confronts a dilemma that illuminates the formation of American individualism to evolve and become fully human requires a heightened engagement with history Americans Emerson argues must realize history's chronology in themselves because their own minds and bodies are its evolving record Whereas scholarship has tended to minimize the mystical underpinnings of Emerson's notion of the self his depictions of the metempsychosis of nature reveal deep roots in mystical traditions from Hinduism and Buddhism to Platonism and Christian esotericism In essay after essay Emerson uses metempsychosis as an open ended template to understand human development In *Leaves of Grass* Walt Whitman transforms Emerson's conception of metempsychotic selfhood into an expressly poetic event His vision of transmigration viscerally celebrates the poet's ability to assume and live in other bodies his American poet seeks to incorporate the entire nation into his own person so that he can speak for every man and woman

*Infancy and History* Giorgio Agamben, 2020-05-05 How and why did experience and knowledge become separated Is it possible to talk of an infancy of experience a dumb experience For Walter Benjamin the poverty of experience was a characteristic of modernity originating in the catastrophe of the First World War For Giorgio Agamben the Italian editor of Benjamin's complete works the destruction of experience no longer needs catastrophes daily life in any modern city will suffice Agamben's profound and radical exploration of language infancy and everyday life traces concepts of experience through Kant Hegel Husserl and Benveniste In doing so he elaborates a theory of infancy that throws new light on a number of major themes in contemporary thought the anthropological opposition between nature and culture the linguistic opposition between speech and language the birth of the subject and the appearance of the unconscious Agamben goes on to consider time and history the Marxist notion of base and superstructure via a careful reading of the famous Adorno Benjamin correspondence on Baudelaire's Paris and the difference between rituals and games Beautifully written erudite and provocative these essays will be of great interest to students of philosophy linguistics anthropology and politics

**The Affirmations of Reason** Sigurd Baark, 2018-01-08 This book examines the speculative core of Karl Barth's theology reconsidering the relationship between theory and practice in Barth's thinking A consequence of this reconsideration is the recognition that Barth's own account of his theological development is largely correct Sigurd Baark draws heavily on the philosophical tradition of German Idealism arguing that an important part of what makes Barth a speculative theologian is the way his thinking is informed by the nexus of self consciousness reason and freedom which was most fully developed by Kant Fichte and Hegel The book provides a new interpretation of Barth's theology and shows how a speculative understanding of theology is useful in today's intellectual climate

*Masters, Slaves and Philosophers* Bernardo Ferro, 2022-02-11 This book examines the relationship between freedom and true knowledge which is a central part of the

hotly debated issue of human freedom Is truth necessary for the attainment of freedom Does a free life require a clear understanding of reality And if so to what extent These questions lead back to a classical philosophical debate of which the first major chapter was written by Plato In the dialogues he describes human life as a peculiar form of imprisonment and calls for a global liberation of human cognition This work analyses this ambitious project and its unique influence on the work of two modern authors Hegel and Nietzsche who explicitly linked the notions of ignorance and truth to those of bondage and freedom or slavery and mastery and whose philosophies are also centred on the liberation of human consciousness Following a historical and systematic approach this book is of interest to readers who are reasonably acquainted with the history of ancient and modern philosophy including undergraduate and graduate students as well as scholars working on Plato German Idealism Nietzsche and other related fields

**Metaphysics and the Modern World** Donald Phillip Verene, 2016-09-02 Metaphysics and the Modern World makes the abiding questions of the nature of the self world and God available for the modern reader Donald Phillip Verene presents these questions in both their systematic and historical dimensions beginning with Aristotle s claim in his Metaphysics that philosophy begins in wonder The first three chapters concern the origin of metaphysics as the transformation of the conception of reality in ancient Greek mythology the ontological argument as the basis of Christian metaphysics and the Renaissance cosmology of infinite worlds and the coincidence of contraries The final four chapters present the central issues of the metaphysics of history through the New Science of Vico the principle of true infinity of Hegel s Logic the dialectic of spirit and life in Cassirer s Metaphysics of Symbolic Forms and the conception of actual entities

and God in Whitehead's Process and Reality In these discussions the reader will find a lively and learned account of a field of philosophy that is often thought difficult to access but in this work becomes most accessible and a pleasure to read

*Phenomenology of Spirit* Georg Wilhelm Friedrich Hegel, 1998 wide criticism both from Western and Eastern scholars

**The Psyche as Interaction: Electromagnetic Patterns of Conscious Energy** Manya J. Long, 2014-06-13 The Psyche as Interaction begins as a journey to explain one person's paranormal experiences Manya Long looks closely at the fields of mathematics physics psychology music religion neurophysiology and parapsychology Along the way she finds many things connecting each of these fields together Her intention when she began was merely to answer questions about her own unique experiences However she quickly realized what she was looking at had the potential to change the way we all view the world This book explains her journey findings and the conclusions she came to

**International Law and the Relationality of States** Erdem Ertürk, 2023-03-23 This book critically engages with theories of the recognition of states under international law Demonstrating that recognition is a constitutive relation that is imperative for the construction of international subjects the book argues that prevalent theories of recognition fall short of accommodating this imperative The book traces the source of this shortcoming to Vattel's notion of absolute sovereignty A paradox pertains to this notion as absolutely independent states seemingly come into being in a community which sets the law that determines statehood The book shows how this paradox is reproduced in constitutive theorists' idea of recognition as a sovereign gesture of consent and declarative theorists' perception that states can come into being on a singular basis without any need for interaction This necessitates a rethinking of the role of recognition in a way that circumvents the problems generated by the notion of absolute independence whilst accommodating the relational element of coming into being To achieve this purpose the book draws upon Hegel's theory of recognition supplementing it with Bataille's and Derrida's critical readings of Hegel's thought In this respect the book departs from the restrictive economy of recognition that constantly recreates a paradoxical perception of sovereignty elaborating a more general economy of recognition that accommodates the notion of subjects in flux This critical engagement with a key notion in international law will appeal to legal and political theorists as well as scholars and students in international relations

**Hegel's Recollection** Charles Howard Candler Professor of Metaphysics and Moral Philosophy Donald Phillip Verene, 1985-01-01 Donald Phillip Verene has advanced a completely new reading of Hegel's *Phenomenology of Spirit* He shows that the philosophic meaning of this work depends as much on Hegel's use of metaphor and image as it does on Hegel's dialectical and discursive descriptions of various stages of consciousness The focus is on Hegel's concept of recollection *Erinnerung* Consciousness confronts itself with the aim of achieving absolute knowing This is the first commentary to regard metaphor irony and memory as keys to the understanding of Hegel's basic philosophical position

**Marx' Critique of Science and Positivism** G. McCarthy, 2012-12-06 political economy With this in mind the reader will be taken through three meta-theoretical levels of Marx' method of analysis of the

structures of capitalism 1 the clarification of critique and method from Kant's epistemology Hegel's phenomenology to Marx political economy Chapter One 2 the analysis of critique and time that is the temporal dimensions of the critical method as they evolve from Hegel's Logic to Marx Capital and the difference between the use of the future in explanatory positivist science and critique Chapter Two 3 and finally critique and materialism a study of the complexity of the category of materialism the ambivalence and ambiguity of its use in Marx critical method and the ontological and logical dilemmas created by the Schelling Feuerbach turn toward materialism in their critique of Hegel Chapter Three The critique of political economy is therefore examined at the levels of methodology temporality and ontology To what do the categories of political economy really refer when the positivist interpretations of Marx have been shattered and critique becomes the method of choice What kind of knowledge do we have if it is no longer scientific in the traditional sense of both epistemology and methodology And what kind of applicability will it have when its format is such as not to produce predictive technical knowledge but practical knowledge in the Greek sense of the word Praxis What becomes of the criterion of truth when epistemology itself like science is

*Hegel's Recollection* Donald Phillip Verene, 1985-06-30 Donald Phillip Verene has advanced a completely new reading of Hegel's Phenomenology of Spirit He shows that the philosophic meaning of this work depends as much on Hegel's use of metaphor and image as it does on Hegel's dialectical and discursive descriptions of various stages of consciousness The focus is on Hegel's concept of recollection Erinnerung Consciousness confronts itself with the aim of achieving absolute knowing This is the first commentary to regard metaphor irony and memory as keys to the understanding of Hegel's basic philosophical position

**Hegel and Deleuze** Karen Houle, Jim Vernon, 2013-06-30 Hegel and Deleuze cannily examines the various resonances and dissonances between these two major philosophers The collection represents the best in contemporary international scholarship on G W F Hegel and Gilles Deleuze and the contributing authors inhabit the as yet uncharted space between the two thinkers collectively addressing most of the major tensions and resonances between their ideas and laying a solid ground for future scholarship The essays are organized thematically into two groups those that maintain a firm but nuanced disjunction or opposition between Hegel and Deleuze and those that chart possible connections syntheses or both As is clear from this range of texts the challenges involved in grasping appraising appropriating and developing the systems of Deleuze and Hegel are varied and immense While neither Hegel nor Deleuze gets the last word the contributors ably demonstrate that partisans of either can no longer ignore the voice of the other

*Hegel and the Sciences of Spirit (Geisteswissenschaften)* Madalin Onu, 2018-05-01 In the context of increasingly numerous cultural and political contradictory debates humanities are facing the difficult responsibility of removing the veil of ambiguity and doubt However they cannot fulfil this task without first undertaking a rigorous return upon themselves their own fundamentals methods and targeted objects This book investigates the influence of G W F Hegel on these sciences during their long and controversial process of transformation and consolidation For this purpose the author developed on Gadamer's

suggestions a dialectical hermeneutical method able to overcome the insufficiencies of both historical and systematic approaches and to properly take into account the significant references to authors of the Modern Age and the Contemporary Era In his attempt to advance a speculative model for the present day social and political sciences the author brings a new light on some renowned topics including agency in history Napoleon Weltgeist or Weltseele on horseback the inner structure of the interpreter Gadamer between Hegel and Heidegger and the critical concept of alienation an overthrow or continuity of absolute idealism among others *Brain States and Neural Mechanisms of Consciousness* Olivia Gosseries,2022-09-30

In Praise of Heteronomy Merold Westphal,2017-05-22 Recognizing the essential heteronomy of postmodern philosophy of religion Merold Westphal argues against the assumption that human reason is universal neutral and devoid of presupposition Instead Westphal contends that any philosophy is a matter of faith and the philosophical encounter with theology arises from the very act of thinking Relying on the work of Spinoza Kant and Hegel Westphal discovers that their theologies render them mutually incompatible and their claims to be the voice of autonomous and universal reason look dubious Westphal grapples with this plural nature of human thought in the philosophy of religion and he forwards the idea that any appeal to the divine must rest on a historical and phenomenological analysis Electric Dreams - The A.I. Musical: The Fan Book Heinz

Siegfried Pestner,2025-06-18 In a future where creativity is controlled and every note brushstroke and story is owned by the system one voice dares to rise Eva a rebellious street artist haunted by a silenced past lives in the shadows of SynTech s glowing towers a world ruled by algorithms where true emotion is outlawed When she crosses paths with Echo an experimental AI built to manufacture synthetic art something extraordinary happens he begins to feel As their bond deepens their passion sparks a resistance a movement that threatens to tear down the digital dictatorship and restore creative freedom to humanity But The Authority won t go down without a fight and their most powerful weapon Mr Zenith is ready to erase anyone who disrupts the system Infused with unforgettable music rich characters and high stakes emotion *Electric Dreams* is more than a story it s a declaration A vision of the future where the soul of art becomes the battlefield And only those who dare to dream can reclaim it **The Caldron of Consciousness** Ralph D. Ellis,Natika Newton,2000-01-01 These

new studies by prominent neuroscientists psychologists and philosophers work toward a coherent framework for understanding emotion and its contribution to the functioning of consciousness in general as an aspect of self organizing embodied subjects Distinguishing consciousness from unconscious information processing hinges on the role of motivating emotions in all conscious modalities and how emotional brain processes interact with those traditionally associated with cognitive function Computationally registering processing sensory signals e g in the occipital lobe or area V4 by itself does not result in perceptual consciousness which requires subcortical structures such as amygdala hypothalamus and brain stem This interdisciplinary anthology attempts to understand the complexity of emotional intentionality why the role of motivation in self organizing processes is crucial in distinguishing conscious from unconscious processes how emotions account for

agency and how an adequate approach to emotion motivation can address the traditional mind body problem through a holistic understanding of the conscious behaving organism Series B      **Continental Philosophy** William McNeill, Karen S. Feldman, 1998-06-08 From Immanuel Kant to Postmodernism this volume provides an unparalleled student resource a wide ranging collection of the essential works of more than 50 seminal thinkers in modern European philosophy Areas covered include Kant and German Idealism Existentialism Phenomenology Hermeneutics Marxism and the Frankfurt School Structuralism Psychoanalysis Feminism Deconstruction and Postmodernism Each section begins with a concise and helpful introduction and all the texts have been selected for accessibility as well as significance making the volume ideal for introductory and advanced levels in philosophy cultural studies literary theory and the history of modern thought      **The Hidden Pattern** Ben Goertzel, 2006 The Hidden Pattern presents a novel philosophy of mind intended to form a coherent conceptual framework within which it is possible to understand the diverse aspects of mind and intelligence in a unified way The central concept of the philosophy presented is the concept of pattern minds and the world they live in and co create are viewed as patterned systems of patterns evolving over time and various aspects of subjective experience and individual and social intelligence are analyzed in detail in this light Many of the ideas presented are motivated by recent research in artificial intelligence and cognitive science and the author s own AI research is discussed in moderate detail in one chapter However the scope of the book is broader than this incorporating insights from sources as diverse as Vedantic philosophy psychedelic psychotherapy Nietzschean and Peircean metaphysics and quantum theory One of the unique aspects of the patternist approach is the way it seamlessly fuses the mechanistic engineering oriented approach to intelligence and the introspective experiential approach to intelligence
