The Short Range

Anti-Gravitational Force and the Hierarchically Stratified Space-Time Geometry in 12 Dimensions Christina Anne Knight, 2010-08-09

The field of cosmology may be on the verge of a significant paradigm shift as there is an increasing awareness that scientists have missed something fundamental as they carry on in their quest for a theory of everything and a theory that unites general relativity with quantum mechanics. Knight proposes a new theory suggesting that the space-time geometry possesses a complex hierarchical structure that comprises twelve dimensions: nine space dimensions and three time dimensions. Furthermore, this structure is divided into three strata, each of which has its own four-dimensional structure and stratum, specific fundamental forces and parameters, with variations in the gravitational constant G , the speed of light c , and the Planck constant. Through the pages of this work, this theory is further explained.

Screening The Sacred Joel Martin,Conrad E. Ostwalt Jr.,2018-03-05 What are the religious impulses in the 1976 film *Rocky* and how can they work to shape one s social identity Do the films *Alien* and *Aliens* signify the reemergence of the earth goddess as a vital cultural power What female archetypes borne out of male desire

inform the experience of women in *Nine and a Half Weeks*. These are among the several compelling questions the authors of this volume consider as they explore the way popular American film relates to religion. Oddly, religion and film, two pervasive elements of American culture, have seldom been studied in connection with each other. In this first systematic exploration, the authors look beyond surface religious themes and imagery in film, discovering a deeper, implicit presence of religion. They employ theological, mythological, and social and political criticism to analyze the influence of religion in all its rich variety and diversity on popular film. Perhaps more importantly, they consider how the medium of film has helped influence and shape American religious culture, secular or otherwise. More than a random collection of essays, this volume brings to the study of religion and film a carefully constructed analytic framework that advances our understanding of both. *Screening the Sacred* provides fresh and welcome insight to film criticism; it also holds far-reaching relevance for the study of religion. Progressive in its approach, instructive in its analyses, this book is written for students, scholars, and other readers interested in religion, popular film, and the impact of each on American culture.

Examination Questions and Answers in Basic Anatomy and Physiology Martin Caon, 2020-08-03. This third edition provides 2900 multiple choice questions on human anatomy and physiology and some biophysical science, separated into 20 chapters and 68 categories. In addition, there are 64 essay topics. The answer to each question is accompanied by an explanation. Each chapter has an introduction to set the scene for the questions to come. However, not all possible information is provided within these introductions, so an *Anatomy and Physiology* textbook is an indispensable aid to understanding the answers. The textbook offers a more holistic approach to the subjects of anatomy and physiology by also including biomechanics, biophysics, and biochemistry. The questions have been used in end-of-semester examinations for undergraduate anatomy and physiology courses and, as such, reflect the focus of these particular courses and are pitched at this level to challenge students that are beginning their training in anatomy and physiology. The question and answer combinations are intended for use by teachers to select questions for their next examinations and by students when studying for an upcoming test. Students enrolled in the courses for which these questions were written include nursing, midwifery, paramedic, physiotherapy, occupational therapy, nutrition, and dietetics, health sciences, exercise science, and students taking an anatomy and physiology course as an elective.
