Payment Of Vaal University 2014 For 2015:

Fees Must Fall Susan Booysen, 2016-10-01 This book explores the student discontent a year after the start of the 2015 South African FeesMustFall revolt. FeesMustFall the student revolt that began in October 2015 was an uprising against lack of access to and financial exclusion from higher education in South Africa. More broadly it radically questioned the socio-political dispensation resulting from the 1994 social pact between big business, the ruling elite and the liberation movement. The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left. Yet its objectives are more complex than those of earlier struggles. The student movement has challenged the hierarchical top down leadership system of university management and its double speak of professing to act in workers and students interests yet entrenching a regressive system for control and governance. University managements while on one level amenable to change have also co-opted students into their ranks to create co-responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution. This book maps the contours of student discontent a year after the start of the FeesMustFall revolt. Student voices dissect colonialism, improper compromises by the founders of democratic South Africa, feminism, worker rights and meaningful education. In depth assessments by prominent scholars reflect on the complexities of student activism, its impact on national and university governance and offer provocative analyses of the power of the revolt. [Reception Studies and Audiovisual Translation](#)

Elena Di Giovanni, Yves Gambier, 2018-06-15 The coming of age of audiovisual translation studies has brought about a much needed surge of studies focusing on the audience, their comprehension, appreciation or rejection of what reaches them through the medium of translation. Although complex to perform, studies on the reception of translated audiovisual texts offer a uniquely thorough picture of the life and afterlife of these texts. This volume provides a detailed and comprehensive overview of reception studies related to audiovisual translation and accessibility from a diachronic and synchronic perspective. Focusing on all audiovisual translation techniques and encompassing theoretical and methodological approaches from translation, media and film studies, it aims to become a reference for students and scholars across these fields.

Social-Environmental Conflicts, Extractivism and Human Rights in Latin America Malayna

Raftopoulos, 2018-12-07 This book focuses on the issues of global environmental injustice and human rights violations and explores the scope and limits of the potential of human rights to influence environmental justice. It offers a multidisciplinary perspective on contemporary development discussions, analysing some of the crucial challenges, contradictions and promises within current environmental and human rights practices in Latin America. The contributors examine how the extraction and exploitation of natural resources and the further commodification of nature have affected local communities in the region and how these policies have impacted on the promotion and protection of human rights as communities struggle to defend their rights and territories. The book analyses the emergence of transnational activism in the context of collective action organised

around socio environmental conflicts the infringement of basic human rights and the emergence of alternative and sometimes conflicting development models Furthermore it critically discusses why governments are often willing to override their commitments to sustainability and human rights to promote their development agenda The chapters originally published as a special issue in The International Journal of Human Rights *Inequality Studies from the Global South* David Francis,Imraan Valodia,Edward Webster,2020-05-04 This book offers an innovative interdisciplinary approach to thinking about inequality and to understanding how inequality is produced and reproduced in the global South Without the safety net of the various Northern welfare states inequality in the global South is not merely a socio economic problem but an existential threat to the social contract that underpins the democratic state and society itself Only a response that is firmly grounded in the context of the global South can hope to address this problem This collection brings together scholars from across the globe with a particular focus on the global South to address broad thematic areas such as the conceptual and methodological challenges of measuring inequality the political economy of inequality in the global South inequality in work households and the labour market and inequalities in land spaces and cities The book concludes by suggesting alternatives for addressing inequality in the global South and around the world The pioneering ideas and theories put forward by this volume make it essential reading for students and researchers of global inequality across the fields of sociology economics law politics global studies and development studies

benefits some species have brought us and their role and impact on natural ecosystems *Political Economy and
Sociolinguistics* David Block,2018-02-08 Shortlisted for the BAAL Book Prize 2019 This book explores how political economy
intersects with sociolinguistics specifically how neoliberalism inequality and social class mediate language in society issues
After the preface in which the author sets the scene for the content of the book Chapter 1 is an extensive though selective
review of sociolinguistics research which has been framed as political economic in orientation The chapter concludes that
such research generally contains little in the way of thorough and in depth coverage of the key ideas and conceptual
frameworks said to undergird it With this consideration in mind Chapters 2 3 and 4 are organised around in depth
discussions of respectively political economy as a general disciplinary frame neoliberalism as the variegated variety of
capitalism dominant in the world today and stratification inequality and social class as phenomena intrinsic to capitalism
which in the neoliberal era have come to the fore as key issues Drawing directly on the background provide in Chapters 2 4
Chapters 5 and 6 explore two distinct political economy informed lines of research on the one hand the neoliberal citizen and
on the other hand discursive class warfare The book ends with an epilogue addressing issues arising around political
economy in sociolinguistics
