## Introduction to Accounting

### *Learning Objectives*

1. Define accounting.
2. Describe the nature and purpose of accounting.
3. Give examples of branches of accounting.
4. State the function of accounting in a business.
5. Differentiate between external and internal users of accounting information.
6. Narrate the history/origin of accounting.
7. State the forms of business organization.
8. State the types of business according to their activities.

### **Definition of accounting**

**Accounting** is a process of identifying, recording and communicating economic information that is useful in making economic decisions.

### **Essential elements of the definition of accounting**

1. **Identifying** – The accountant analyzes each business transaction and identifies whether the transaction is an “accountable event” or “non-accountable event.” This is because *only “accountable events” are recorded* in the books of accounts. “Non-accountable events” are not recorded in the books of accounts.

**“Accountable events”** (or ‘economic events’) are those that affect the assets, liabilities, equity, income or expenses of a business. Sociological and psychological matters are outside the scope of accounting.

2. **Recording** – The accountant recognizes (i.e., records) the identified “accountable events.” This process is called **journalizing**.
