Phase 2 Memo For Tourism:

Qualitative Methods in Tourism Research Wendy Hillman, Kylie Radel, 2018-01-05 This volume seeks to expose and illustrate new approaches and thinking in qualitative methods that are being developed and implemented in tourism research. The contributions bring together various qualitative methods and approaches while also providing suggestions for the juxtaposition of qualitative and quantitative methods in mixed methods research. The book has been written with a cross disciplinary approach which provides an insight into the art of research development from business sociology and tourism perspectives. The chapters provide readers with a context and practical application examples for each method. They present a distinctive opportunity for social researchers from a range of disciplines in particular tourism to examine how to adapt the wide variety of qualitative approaches to their particular research needs.

Tourism and Poverty Reduction Anna Spenceley, Dorothea Meyer, 2017-10-02 Over the past decade there have been an increasing number of publications that have analysed and critiqued the potential of tourism to be a mechanism for poverty reduction in less economically developed countries (LEDCs). This book showcases work by established and emerging researchers that provides new thinking and tests previously made assumptions providing an essential guide for students, practitioners and academics. This book advances our understanding of the changes and ways forward in the field of sustainable tourism development. Five main themes are illustrated throughout the book: 1. measuring impacts of tourism on poverty; 2. the need to evaluate whether interventions that aim to reduce poverty are effective; 3. how unbalanced power relations and weak governance can undermine efforts; 4. the importance of the private sector's use of pro-poor business practices; and 5. the value of using multidisciplinary and multi-method research approaches. Furthermore, the book shows that academic research findings can be used practically in destinations and how practitioners can benefit from sharing their experiences with academic scholars. This book was based on a special issue and various articles from the *Journal of Sustainable Tourism*.

Nominations of the 110th Congress, Second Session United States. Congress. Senate. Committee on Foreign Relations, 2009. *Tourism and Colonization in Indochina (1898-1939)* Aline Demay, 2015-01-12 Direct flights to former imperial capitals, continued visits to the same tourist sites and the emergence of tours dedicated to the imperial past all pose the question of the heritage of tourism in the former colonies. Lesser known as a field of research, the study of tourism in colonial situations has begun to impose itself over the past decade as an important issue. Interestingly, in the colonial era, tourism was one element of the policies used by the colonial power to highlight its colony. The use of tourist activities for political ends was first confirmed in an October 2, 1922 circular composed by the Minister of the Colonies, Albert Sarraut. This circular required all French overseas territories to organize and develop the tourism sector because, along with its economic benefits, the tourist of today can be the colonist of tomorrow. This theme, along with knowledge related more specifically to tourism such as the creation of sites and tours and the background of tourists, also contributes to sanitary, environmental and planning questions as well as issues concerning the

construction of national sentiment How did tourism develop in a territory during the period of colonial expansion How are tourism and colonization related What connections can be found between the two Using archives and tourist publications this book marks an unprecedented work of research into the enactment of tourism in Indochina It places the establishment of tourism in this former French colony along with the tourism policies of Metropolitan France and the attempts to reproduce the organizations established in the Dutch East Indies and in Japan The book which focuses on events in the period from the turn of the twentieth century to the eve of the Second World War analyses the transfer of European tourism practices to Indochina their establishment their integration with policies of valorisation in the 1920s their spatial consequences and the communication established by the state to promote Indochina as a tourist destination for both Indochinese and foreign tourists

Tourism Studies: The Emergence of a New Systemic Approach. Examples from the United States and Europe Piero Innocenti, 2011 The idea of introducing this handbook derives from the realization that tourism is often the object of a single issue analysis lacking an organic vision The fact that this complex phenomenon manifests itself in space meant in concrete terms and presents economic territorial implications of varied nature privileges those who inquire it mainly from a territorial point of view like economic geographers The approach followed while enhancing the three most important moments in which tourism occurs i.e. the outgoing the movement and the incoming is applicable both on a regional or even local level and on a general scale thus allowing to make those abstractions than many scholars believe to be fundamental to the definition of their discipline as a real science
