Considering Animals Dr Carol Freeman, Dr Elizabeth Leane, Ms Yvette Watt, 2013-07-28 Considering Animals draws on the expertise of scholars trained in the biological sciences humanities and social sciences to investigate the complex and contradictory relationships humans have with nonhuman animals Taking their cue from the specific animal moments that punctuate these interactions the essays engage with contemporary issues and debates central to human animal studies the representation of animals the practical and ethical issues inseparable from human interactions with other species and perhaps most challengingly the compelling evidence that animals are themselves considering beings Case studies focus on issues such as animal emotion and human sentimentality the representation of animals in contemporary art and in recent films such as March of the Penguins Happy Feet and Grizzly Man animals experiences in catastrophic events such as Hurricane Katrina and the SARS outbreak and the danger of overvaluing the role

humans play in the earth's ecosystems From Marc Bekoff's moving preface through to the last essay Considering Animals foregrounds the frequent sometimes uncanny exchanges with other species that disturb our self-contained existences and bring into focus our troubled relationships with them Written in an accessible and jargon-free style this collection demonstrates that in the face of species extinction and environmental destruction the roles and fates of animals are too important to be left to any one academic discipline

A Sense of Belonging Jennifer Allen, 2023-10-10 Too often new teachers enter the profession excited to make a difference in the lives of children only to find themselves disillusioned and overwhelmed with the expectations of the classroom In A Sense of Belonging Jennifer Allen shares her stories and journey in creating an infrastructure of support for new teachers within her school district A Sense of Belonging provides research-based practical ideas on how to support new teachers while honoring the innovation idealism and optimistic enthusiasm that they bring to the classroom From supporting new teachers early in the year with administering and analyzing literacy assessments through using student work to guide instruction to offering ongoing help with curriculum planning Jennifer shares strategies on fostering relationships with new teachers starting before school even begins creating learning environments for new teachers to be reflective practitioners coaching new teachers in their classrooms and providing opportunities for them to observe their peers in action supporting new teachers beyond their first year through gradual release of support over their first several years in the classroom and facilitating professional development opportunities where new and veteran teachers learn alongside one another Jennifer believes and her book demonstrates that when schools embrace encourage and celebrate the work of new teachers they establish a supportive environment that fosters excellence and improves retention

Rubrics - a tool for feedback and assessment viewed from different perspectives Ivo de Boer, Femmie de Vegt, Helma Pluk, Mieke Latijnhouwers, 2021-11-17 This IAMSE Manual describes how to use rubrics in higher education especially in the highly specialized health sciences education setting The book provides a conceptual framework practices and a series of checklists that lecturers can use to design their own rubrics for a variety of situations and content It highlights varying perspectives from teachers students educational advisors and curriculum managers while providing practical tips for developing and using rubrics The objectives of the manual include guiding health sciences educators in Providing useful actionable and efficient feedback to students on assignments using a structured format i.e. using rubrics Implementing a learning culture where giving rich feedback is standard practice Using rubrics to increase quality of assessment of assignments validity reliability transparency Incorporating in the instructional setting latest insights in the appropriate use of rubrics in the health sciences education setting

Bioethics in Singapore John Elliott, W. Calvin Ho, Sylvia S. N. Lim, 2010 This book provides an analysis of the ways in which the BAC has established an ethical framework for biomedical research in Singapore following the launch of the Biomedical Sciences Initiative by the Singapore Government The editors and authors have an intimate knowledge of the working of the BAC and the focus of the book includes the ways in

which international forces have influenced the form and substance of bioethics in Singapore Together the authors offer a comparative account of the institutionalisation of biomedical research ethics in Singapore considered in the wider context of international regulatory efforts The book reviews the work of the BAC by placing it within the broader cultural social and political discourses that have emerged in relation to the life sciences since the turn of the 21st century This book is not primarily intended to be a retrospect or an appraisal of the contribution of the BAC though this is one aspect of it Rather the main intention is to make a substantive contribution to the rapidly emerging field of bioethics Ethical discussions in the book include consideration of stem cell research and cloning genetics and research with human participants and focus on likely future developments as well as the past Many of the contributors of the book have been personally involved in this work and hence they write with an authoritative first hand knowledge that scholars in bioethics and public policy may appreciate As indicated above the book also explains the way in which ethics and science international and local have interacted in a policy setting Scholars and policy makers may find the Singaporean experience to be a valuable resource as the approach has been to make the ethical governance of research in Singapore consistent with international best practice while observing the requirements of a properly localised application of universally accepted principles In addition at least three chapters the first three chapters in particular are accessible to the lay reader interested in the development of bioethics and biomedical sciences both inside and outside Singapore from 2000 the year in which the BAC was established Both scholars and interested lay readers are therefore likely to find this publication a valuable reference
