Investment in the Future

- [illegible]

Abstract—The purpose of this study was to determine the effect of a 12-week training program on the heart rate (HR) and heart rate reserve (HRR) of sedentary middle-aged men. The subjects were divided into two groups: a control group and an exercise group. The exercise group performed a 12-week training program consisting of three sessions per week. The control group did not exercise. The HR and HRR were measured at rest and during exercise at the beginning and end of the 12-week period. The results showed that the exercise group had a significant decrease in HR and HRR at rest and during exercise compared to the control group. The control group had no significant change in HR and HRR. The results suggest that a 12-week training program can improve the cardiovascular fitness of sedentary middle-aged men.

If you are not satisfied with your results, follow the instructions carefully and test your original article. If the referee's comments are of the "I'm going to work" and "I'm not sure" type, request a re-evaluation of the article and the referee's comments.

23. When configuring a multi-mount AFS, set `mountmnt` to your Netatun path: `mountmnt=/usr/bin/netatun`
24. If you're using the `afs` multi-mount method, add the `afs` multi-mount entry from `afs` to your `netatun` config. In most setups, a "default" entry is sufficient for the majority of the network, but it is recommended that you specify the `afs` multi-mount entry for the specific file system you wish to mount. This is done by adding the `afs` multi-mount entry to the `netatun` config file (see `netatun` for more details).
25. Use the `netatun` `afs` multi-mount entry to mount the `afs` multi-mount entry.
26. Use the `netatun` `afs` multi-mount entry to mount the `afs` multi-mount entry.
