THEATERSYNC BRINGS THE POWER of Silicon Optix HQV™ (Hollywood Quality Video) technology to NEC's full line of projectors and plasma displays. TheaterSync is a high-performance video processor that accepts standard and high definition video signals from almost any consumer or professional device (e.g. DVD, VCR, cable or satellite set-top box, off-air tuner, etc...). With seven inputs, including component, DVI, HDMI and SD/HI SDI, TheaterSync also acts as a switcher between all inputs. Sources connected to the TheaterSync are processed and then output to the connected display with the correct aspect ratio and native resolution. TheaterSync optimizes the signal output to the display by utilizing:

- State of the art, motion adaptive de-interlacing for both SDTV and HDTV which results in video with no interpolation errors causing unwanted horizontal lines during motion.
- Temporal Recursive noise reduction reduces random noise in static areas of the image by analyzing multiple fields using a motion adaptive, noise adaptive approach.
- Codec noise reduction (includes mosquito noise reduction and block artifact removal) eliminates edge and block noise caused by MPEG compression.
- Detail enhancement improves edge contrast and depth without causing ringing or haloing.
- Fully automatic detection and correction for multiple film/video cadences (e.g. - 3:2, 2:2, vari-speed, 5:5, 6:4, 8:7, etc.) results in video that has no detail loss due to missing field information.
- Adaptive brightness-contrast enhancement for crystal clear images.
- Colorspace conversion and color temperature adjustment at 10 bits per component enables processing of over 1 billion colors providing finer detail and greater dynamic color range matching the input video source.
- Audio delay (lip-sync) correction enables the audio to be in sync with the video.
- Geometric correction capability for extreme off-axis keystone correction provides +/- 40° of horizontal and 30° vertical keystone correction with minimal image loss allowing flexible projector display placement.

TheaterSync utilizes HQV™ image processing from Silicon Optix.

Because it's your image.
