Superintendent of Documents,1979 **Rethinking Pain in Person-Centred Health Care** Stephen Buetow,2020-12-30 This book explores how person centred health care could be refined to help persons alleviate pain related distress and construct pain as a potentially positive experience Rethinking Pain in Person Centred Health Care is a fascinating contribution to the multidisciplinary literature on person centred health care pain and ethics Traditionally Western intellectual culture has downplayed the intuitive and emotional promoting instead rational natural scientific perspectives Applied to pain an instrumental approach promotes the immediate and effective relief of pain due to the widespread suffering and expense it can cause However different persons experience pain in different ways and Buetow moves beyond a commitment to eliminate pain to exploring how benefits of pain could include creating and managing meaning from pain Rather than always looking to put pain behind them persons may flourish by moving around pain through pain into pain and above pain Buetow argues that this model depends on adopting a person centred approach to health care focusing less on the condition of pain and more on mobilizing the persons who present with and manage pain This book will be of interest to professionals and academics researchers in the fields of psychology and psychiatry who have a special interest in people with persistent pain conditions It will also be an invaluable resource for physiotherapists chronic pain consultants in secondary care and GPs [ERDA Energy Research Abstracts](#) United States. The Cultivator & Country Gentleman, 1871 [Global Optimization](#) Leo Liberti, Nelson Maculan, 2006-06-22 Most books about global optimization describe the theory of the algorithms whereas a given implementation's quality never depends exclusively on the theoretical soundness of the algorithms that are implemented The literature rarely discusses the tuning of algorithmic parameters implementation tricks software architectures and the embedding of local solvers within global solvers And yet there are many good software implementations out there from which the entire community could learn something The scope of this book is moving a few steps toward the systematization of the path that goes from the invention to the implementation and testing of a global optimization algorithm Some of the contributors to the book are famous and some are less well known but all are experts in the discipline of actually getting global optimization to work Thus the papers in this book address the following topics Descriptions of new implementations of general purpose or problem specific global optimization algorithms New algorithms in global optimization some with numerical results and a discussion of the implementation Surveys discussing existing software packages
