Artificial Immune Systems Giuseppe Nicosia, Vincenzo Cutello, Peter John Bentley, Jonathan Ian Timmis, 2004-08-19 Artificial Immune Systems have come of age They are no longer an obscure computer science technique worked on by a couple of farsighted research groups Today researchers across the globe are working on new computer algorithms inspired by the workings of the immune system This vigorous field of research investigates how immunobiology can assist our technology and along the way is beginning to help biologists understand their unique problems AIS is now old enough to understand its roots its context in the research community and its exciting future It has grown too big to be confined to special sessions in evolutionary computation conferences AIS researchers are now forming their own community and identity The International Conference on Artificial Immune Systems is proud to be the premiere conference in the area As its organizers we were honored to have such a variety of innovative and original scientific papers presented this year ICARIS 2004 was the third international conference dedicated entirely to the field of Artificial Immune Systems AIS It was held in Catania on the beautiful island of Sicily Italy during September 13-16 2004 While hosting the conference the city of Catania gave the participants the opportunity to enjoy the richness of its historical and cultural atmosphere and the beauty of its natural resources the sea and the Etna volcano

Telecommunications And Networking - ICT 2004 José Neuman De Souza, Petre Dini, Pascal Lorenz, 2004-07-20 This book constitutes the refereed proceedings of the 11th International Conference on Telecommunications ICT 2004 held in Fortaleza Brazil in August 2004 The 188 revised full papers presented were carefully reviewed and selected from 430 submissions The papers are organized in topical sections on multimedia services antennas transmission technologies and wireless networks communication theory telecommunication pricing and billing network performance and telecommunication services active network and mobile agents optical photonic techniques optical networks ad hoc networks signal processing network performance and MPLS traffic engineering SIP QoS and switches network operation management mobility and broadband wireless cellular system evolution personal communication satellites mobility management network reliability ATM and Web services security switching and routing next generation systems wireless access Internet etc

e-Business and Telecommunication Networks João Ascenso, Luminita Vasiu, Carlos Belo, Mónica Saramago, 2006-08-18 This book contains the best papers of the First International Conference on e-Business and Telecommunication Networks held in 2004 The book presents recent research on e-business and telecommunication networks It includes analyses aspects of global communication information systems and services and describes security and reliability problems and solutions in information systems and networks

Self-organising Software Giovanna Di Marzo Serugendo, Marie-Pierre Gleizes, Anthony Karageorgos, 2011-09-15 Self-organisation self-regulation self-repair and self-maintenance are promising conceptual approaches for dealing with complex distributed interactive software and information handling systems Self-organising

applications dynamically change their functionality and structure without direct user intervention responding to changes in requirements and the environment This is the first book to offer an integrated view of self organisation technologies applied to distributed systems particularly focusing on multiagent systems The editors developed this integrated book with three aims to explain self organisation concepts and principles using clear definitions and a strong theoretical background to examine how self organising behaviour can be modelled analysed and systematically engineered into agent behaviour and to assess the types of problems that can be solved using self organising multiagent systems The book comprises chapters covering all three dimensions synthesising up to date research work and the latest technologies and applications The book offers dedicated chapters on concepts such as self organisation emergence in natural systems software agents stigmergy gossip cooperation and immune systems The book then explains how to engineer artificial self organising software in particular it examines methodologies and middleware infrastructures Finally the book presents diverse applications of self organising software such as constraint satisfaction trust management image recognition and networking The book will be of interest to researchers working on emergent phenomena and adaptive systems It will also be suitable for use as a graduate textbook with chapter summaries and exercises and an accompanying website that includes teaching slides exercise solutions and research project outlines
