Read this manual and keep for future reference.

GENERAL

This Manual is a guide to help assist with the operation of this ductless system. It does not contain the service procedures that have to be performed by a qualified HVAC service technician.

IMPORTANT

- Make sure you read this manual before you start operating your new ductless system.
- After reading this manual, if you still need more information that may not have been covered in this manual, please contact your HVAC contractor.
- To ensure comfort, make sure that temperature selection has been properly set at the remote control. To ensure efficient operation, do not block air intake or outlet at either the indoor or outdoor unit. Also, do not stand nor put items on top of outdoor and indoor units.
- If any issues with your system were to arise, please contact your HVAC contractor.
- Make sure your windows and doors are shut when operating your ductless system.

NOTICE

The refrigerant inside your ductless product uses PVE oil (Polyvinyl Ether Oil) that readily absorbs moisture from the atmosphere. To limit this "hygroscopic" action, the system should remain sealed whenever possible. If a system has been open to the atmosphere for more than 4 hours, the compressor oil must be replaced. Do not break a vacuum with air and always change the driers when opening the system for component replacement. For specific handling concerns with PVE oil, contact your HVAC contractor. Failure to follow these recommendations could result in equipment damage.
